Save91 / SaveMore

Working name, to be finalised

Seed plan

Daily saving for India's self-employed, in mutual funds, in their own name. Online-first across India, with a doorstep pilot in NCR.

$500k

seed raise

24 months

plan period, plus a 25% contingency

1 lakh

sign-ups; ~22,200 start saving, ~13,400 still saving at month 18

5 people

Piyush (CEO), Sandeep (CPTO) + 3 hires

To build the product and measure the five facts that decide the business. Revenue is not counted anywhere in the seed budget.

The business case assumes debits cost us ₹0 and a 0.75% equity fund fee, both still to be confirmed in writing: ₹2 a weekly debit, or a 0.5% fee, would cut what a saver earns back in 5 years from 0.75× of the cost to win them to about 0.39× or 0.49×. The seed gets both in writing before launch.

THE SEED'S JOB

The seed's job is to measure the five facts that decide the business

Two of them can each lift a saver past 1× on their own. Two are still unconfirmed and must be put in writing. No single loan number reaches 1×.

ONE SAVER, AT TODAY'S MARKET NUMBERS

Cross-selling alone (loans and cards): ₹143 per saver in 5 years, ₹173 in 8. That is 0.29× and 0.35× of the ₹495 it costs to win a saver, before serving, and less than the ₹190 / ₹225 it costs to serve them, so on its own it never pays back (−0.10× after serving). Insurance, recharge, bills, fixed deposits and pensions are not counted.

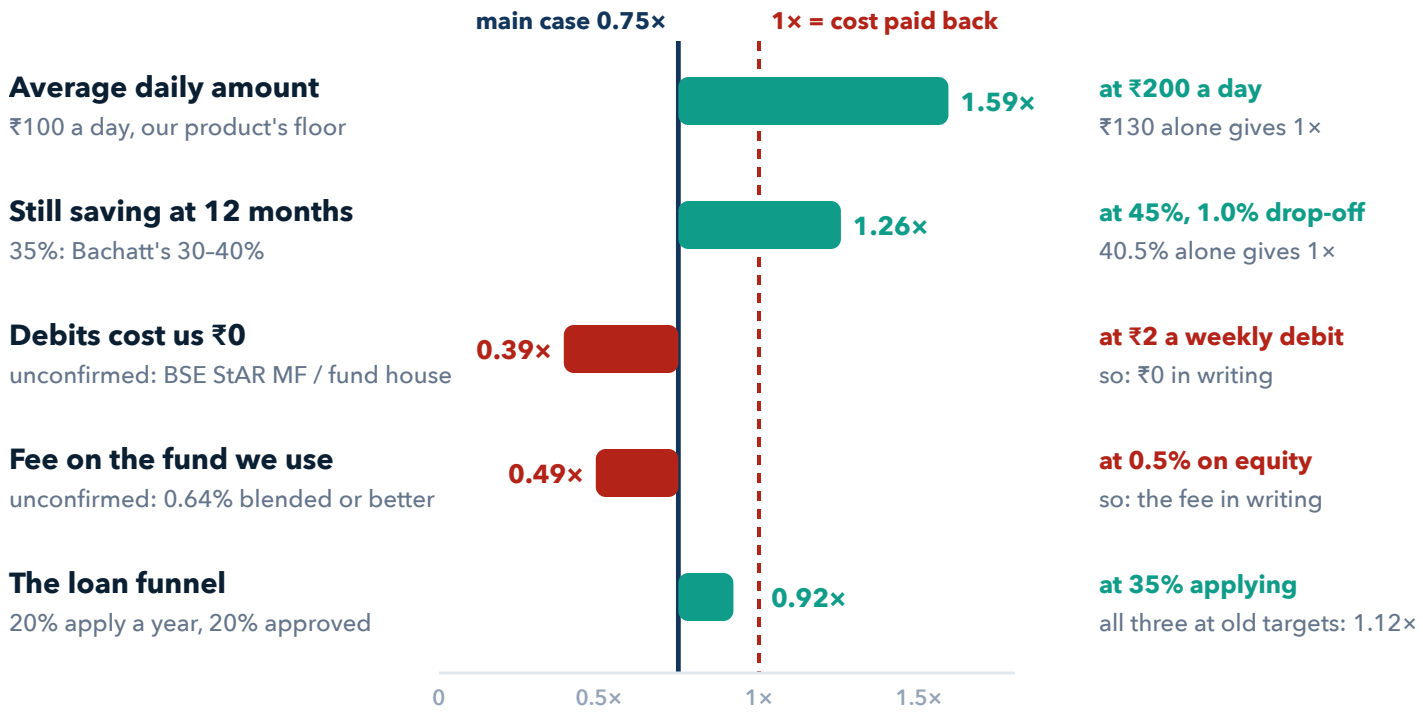

WITH FUND FEES, AFTER SERVING

0.75× in 5 years: ₹370 back on the ₹495 cost to win them

1.32× in 8 years: ₹655

Month 75 when a saver has paid back the cost to win them

WHAT EACH FACT DOES TO ONE SAVER'S 5-YEAR RETURN, ONE AT A TIME

5-year return (LTV/CAC) = what a saver brings in over 5 years, less the cost of serving them, divided by what it costs to win them. Main case: inputs fixed by the founders on 24 October (market figures, Bachatt, or our judgement; appendix). We ran the model 1,000 times, picking retention (Bachatt's 30–40%) and the debt fund's fee at random within their ranges: 8 in 10 draws give 0.60×–0.93× at 5 years and 1.00×–1.76× at 8.

THE $500K

The money builds the product first; 25% is held as contingency

PRODUCT AND TEAM	CUSTOMER ACQUISITION	CONTINGENCY
$240k · 48%	$133k · 27%	$127k · 25%

Product and team · $240k

Salaries: 2 founders + 3 hires	$92k
App: build and running	$54k
Office and fund-raising	$24k
Setup, licences, compliance	$22k
Support, payments and per-user tech	$45k
Design while building	$3.2k

24 months. Salaries $92k, founders at $1,000 a month each.

Customer acquisition · $133k

Online sign-ups	$102k
KYC (identity) checks	$22k
Doorstep pilot, NCR	$8.6k

1 lakh sign-ups in months 4–18; ₹570 per saver won, online and doorstep blended (₹600 online).

Contingency · $127k

Covers the downside. If a sign-up costs ₹200, not ₹100, acquisition costs $235k and the plan still fits in $500k, with about $25k to spare.

Or buys time. If the next round is late, it keeps the lean team and the savers served while the round closes. The company plan raises the next round in month 19, on the facts the seed has measured; it does not count this reserve.

All figures over 24 months, at a planning rate of ₹95 per $. Revenue is not included, so every number is a cost.

WHAT THE MONEY BUILDS

Four releases in 18 months, with customers using it from month 4

1 Save
Months 1–3 · live in month 4

- ✓ Sign-up with e-KYC and a bank check
- ✓ Daily saving from ₹100, likely in one hybrid fund
- ✓ One UPI Autopay mandate
- ✓ Withdraw any day: back in 1–3 working days; equity funds may charge an exit fee in year 1

2 Habit
Months 4–9

- ✓ Goals, streaks and nudges
- ✓ Referrals (no cashback, by rule)
- ✓ Doorstep agent app for the pilot
- ✓ Savings analytics

3 Offers
Months 7–12

- ✓ Loan offers for users who opt in; saving improves them
- ✓ Insurance via a broker (fixed fee)
- ✓ Credit cards from issuers
- ✓ Shown only when relevant

4 Score and plan
Months 10–18

- ✓ Savings-record score
- ✓ AI money coach
- ✓ Wallet-like view; money stays in funds
- ✓ Better offers for steady savers

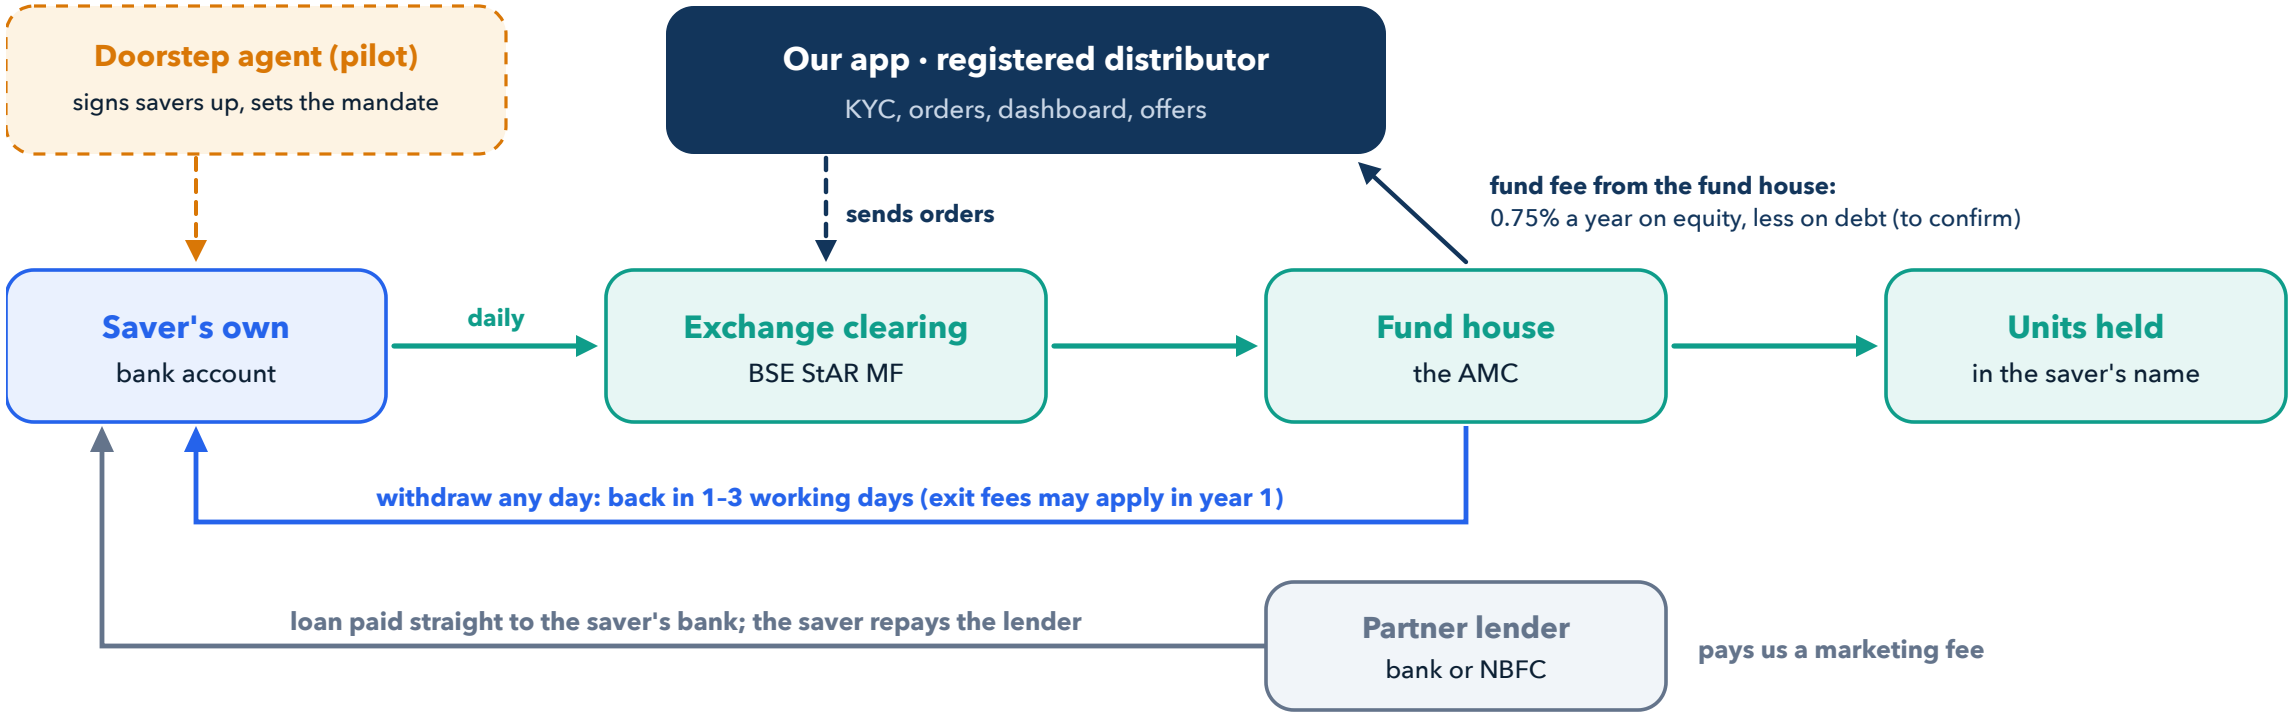

THE FIRST APP: SIX SCREENS

KYC = the identity check every fund investor passes. UPI Autopay mandate = the saver's one-time permission for the daily debit. SIP = a standing order to buy a fund, here every day.

THE MONEY FLOW

Money moves from the saver's bank to the fund and back, never through us

In the saver's name
Units sit with the fund house, registered to the saver.

Never through us
We hold no customer money, ever.

Paid by partners
Fund houses and lenders pay us. A regular plan costs the saver about 0.5–1% a year more than a direct plan; we say so up front.

Sources: SEBI (payments come from the investor's own account); BSE StAR MF (no fee to distributors; ₹0 a debit to us, to confirm in writing); fund-house disclosures.

LICENCES AND TIE-UPS

Day one needs no RBI licence; each later step adds one

BEFORE LAUNCH · MONTHS 0-3

Company setup, ₹1.25 lakh
includes AMFI distributor registration (₹40,000 + GST)

NISM exam for both founders
₹1,500 + GST each; renewed every 3 years

BSE StAR MF access
orders and daily SIP mandates; no transaction fee to distributors; ₹0 a debit to us, in writing

3–5 fund houses
empanelled; the ₹100 daily minimum and the fee on the fund we use (0.64% blended or better), in writing

KYC and UPI Autopay partners
e-KYC ₹3–7 a check (₹40 budgeted per KYC with KRA, PAN and bank checks); daily mandates allowed

Data protection
consent flows and data kept in India

AFTER LAUNCH · MONTHS 4-12

Loans as a lender's marketing partner
from month 7: partner lenders pay us a fee per loan (a direct selling agent); RBI digital-lending rules apply (the borrower pays us nothing)

Insurance through a broker partner
from month 7, for a fixed referral fee; our own registration later

Credit cards with issuers
the issuer decides every card

Legal opinions first
lender-offer consent, the insurance fee, agent rules; agents never handle cash

WE WILL NEVER

- ✕ Hold customer money
- ✕ Offer cashback on funds or insurance
- ✕ Run lucky draws or savings circles
- ✕ Use anyone's data without consent

WITH THE NEXT ROUND

Deeper lender partnerships
larger fees on a proven book; first-loss cover only with its own capital (up to 5% of loans, held as cash)

Own NBFC (non-bank lender)
₹10 crore of capital; about 8–14 months or more

Insurance distribution licence
under IRDAI's draft rules, once final

Sources: AMFI, NISM, RBI Digital Lending Directions 2025, RBI NBFC capital norms, IRDAI, Banning of Unregulated Deposit Schemes Act 2019, Digital Personal Data Protection Act 2023.

FIVE PEOPLE

Five people, and $92k of salaries over 24 months

Piyush

CEO · $1,000 a month

- Growth: ads, referrals, brand
- Partnerships: fund houses, lenders, insurers
- Fund-raising and investors
- Compliance and finance, with the CA and lawyer
- Runs the doorstep pilot (2 agents)

Sandeep

CPTO · $1,000 a month

- Product: roadmap, design, app
- Engineering: integrations, security
- Data: the savings-record score, AI coach
- Product operations: KYC, mandates, support

WORKS WITH

2 doorstep agents (pilot)
in the customer budget, not salaries — m4–18 · ₹26k each

CA and lawyer
in the compliance budget — m1 · retainer

REPORTS TO SANDEEP

Engineer, full-stack + mobile
builds the app with Sandeep — m1 · ₹1.1L

Ops + support executive
KYC, failed debits, withdrawals — m4 · ₹30k

Junior engineer
offers, agent app, the score — m7 · ₹50k

SALARIES OVER 24 MONTHS: $92k

Founders draw $1,000 a month each until the next round. Hire pay is monthly cost to company. Design is outsourced while the app is built.

1 LAKH SIGN-UPS

1 lakh sign-ups for $133k, and the plan holds even if they cost twice as much

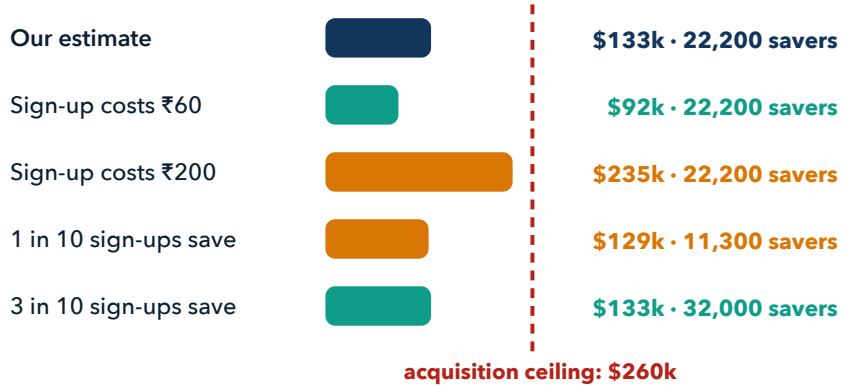

THE FUNNEL, MONTHS 4-18

Online sign-ups	97,200	₹100 each
Finish KYC	48,600	1 in 2
Start saving, online	19,400	2 in 5 of KYC'd
Doorstep savers	2,800	2 agents; saving starts at sign-up
Savers won	22,200	13% from the doorstep
Still saving at month 18	13,400	

₹570
to win a saver, all-in

$133k
for 1 lakh sign-ups

WHAT 1 LAKH SIGN-UPS COSTS IF ONE NUMBER MOVES

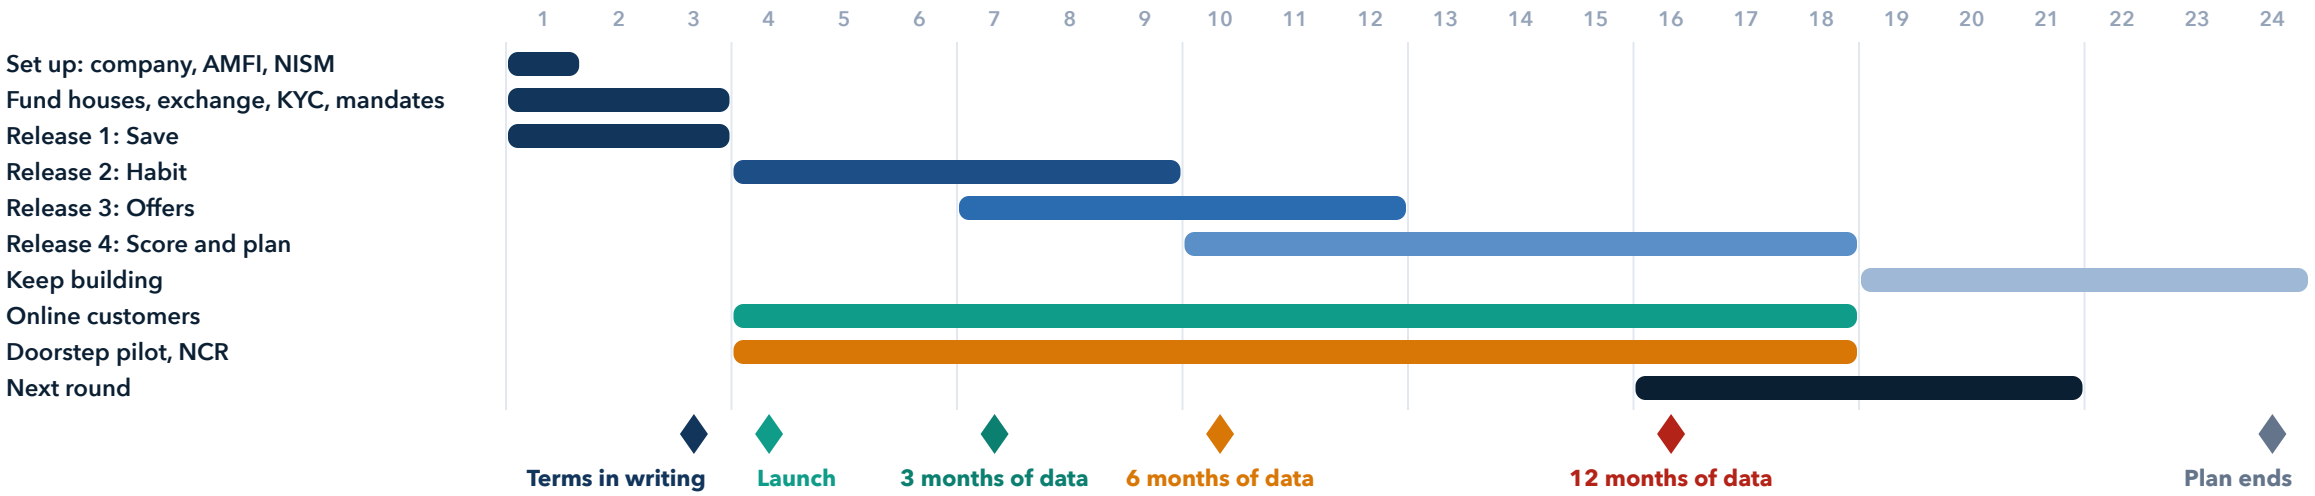

Plan: 1 in 5 sign-ups save. Fewer savers need fewer doorstep agents, so that case costs a little less.

Install costs, vendor benchmarks: fintech median ₹75, wealth apps ₹100–300. Still saving at 12 months: 35% online, the middle of Bachatt's 30–40% (SBI MF's ₹250 daily SIP agrees, about 38%), and the seed measures it; 55% at the doorstep.

24 MONTHS

Build, launch, measure the five facts, then raise on 12 months of data

WHAT THE SEED MEASURES, AND WHEN

BY MONTH 3, BEFORE LAUNCH

₹0 debit cost, in writing (unconfirmed)

From BSE StAR MF and the fund houses, likely one hybrid fund taking the whole ₹100. At ₹2 a weekly debit: 0.39×, not 0.75×, and $11.7M+ needed, not $9.3M+.

BY MONTH 3, BEFORE LAUNCH

The fee on our fund, in writing (unconfirmed)

The fee on the fund the ₹100 goes into: 0.64% blended or better (0.75% on equity, about 0.22% on debt, 80/20). At 0.5% on equity: 0.49×, $10.6M+.

MONTH 7: THREE MONTHS OF SAVERS

The average daily amount

₹100 is our product's floor; Bachatt's average is unknown and its own minimums are lower. An average of ₹130 gives 1× on its own.

MONTHS 7 AND 10, FINAL AT MONTH 16

Still saving at 12 months

Early reads at 3 and 6 months, the full year at month 16. 35% is the main case; 40.5% gives 1× on its own.

MONTHS 7–16, FROM THE FIRST OFFERS

The real loan funnel

Who opts in, applies for a first loan and is approved. The main case: 20% apply a year, 20% approved (the founders' market figure, between 11% and 25%).

MONTHS 4–18

Cost to win, and the doorstep arm

The seed budgets ₹600 an online saver (₹570 with the doorstep) and measures it; ₹450 at scale is the founders' figure. The doorstep arm stays only if it clearly beats online's still-saving rate.

WHAT THE NEXT ROUND NEEDS

At the main case the company isn't profitable within 8 years; a saver worth 2× brings profit from month 68

At 20,000 online savers won a month from month 30, each saver earns back less than the cost to win them within 5 years, so growing faster deepens the loss.

	SAVED A DAY	STILL SAVING AT 12 MONTHS	APPLY FOR A LOAN A YEAR	FIRST LOANS APPROVED	ONE SAVER, 5 YEARS		8 YEARS	SAVER PAYS BACK	COMPANY EBITDA-POSITIVE	MONEY NEEDED
Main case: the plan	**₹100**	**35%**	**20%**	**20%**		**0.75×**	**1.32×**	**month 75**	**not by month 96**	**$9.3M+**
A saver worth 1×	₹115	36%	22%	22%		**1.00×**	1.79×	month 61	not by month 96	$8.1M+
A saver worth 2×	₹161	41%	29%	26%		**2.00×**	3.79×	month 39	from month 68	$5.1M
A saver worth 3×	₹194	44%	34%	29%		**3.00×**	5.99×	month 31	from month 55	$4.0M

The main case is the plan

₹100 a day, 35% still saving and today's loan market; across Bachatt's 30–40% still saving it spans 0.57×–0.98×. The other rows are targets the seed must prove, not other plans.

1× is not enough

At 1× the company still loses money at month 96 ($8.1M+). How 1× comes matters: all three loan numbers at our old targets give 1.12× and profit from month 85, as loan fees arrive early and fund fees build slowly.

$9.3M+ is the least it needs

At the main case the cash hole is still deepening at month 96 (about ₹80 Cr of operating losses by then); if run on, the cash hole bottoms around year 12 at about $10.6M.

Each row moves the five levers together from the main case towards all five at their upside (₹200 a day, 45% still saving with a 1.0% drop-off a month after, 35% applying, 30% approved, yearly rises of 5% and 10%). Money needed = the seed + the deepest cash hole (fees arrive 2 months late) + a ₹5 crore cash buffer, at ₹95 = $1; + = at least. EBITDA = operating profit before interest, tax and depreciation.

ASSUMPTIONS: THE SEED

Every number in the seed budget, and where it comes from

ASSUMPTION	VALUE	BASIS
Planning rate	₹95 per $	Founders' planning rate
Founders' pay	$1,000 a month each	Founders' decision, until the next round
Hires (monthly cost to company)	Engineer ₹1.1L · junior engineer ₹50k · ops ₹30k	Our estimate
Company setup	₹1.25 lakh, one-time	Includes AMFI registration, ₹40,000 + GST
Compliance	₹10 lakh a year	CA, legal, renewals; our estimate
App	₹15 lakh to integrate, ₹1.5 lakh a month to run	Our estimate
Office	₹75,000 a month	Co-working
Online sign-up	₹100 each	Our estimate; app installs cost ₹75 (fintech median) to ₹100–300 (wealth apps)
Sign-up to saver	1 in 2 finish KYC; 2 in 5 of them start saving	Our estimate; the first thing the launch measures
KYC	₹40 per sign-up	e-KYC ₹3–7, KRA upload ₹30, PAN and bank checks
Still saving at 12 months	35% online · 55% doorstep	Online: the middle of Bachatt's 30–40% (SBI MF's ₹250 daily SIP agrees, about 38%); doorstep: our street-savings estimate
Doorstep agent	₹26,000 a month all-in; 100 sign-ups a month, saving from sign-up	Our estimate, from field-sales practice
Customer support	₹5 per active saver a month	Our estimate
Payments	₹2 a weekly debit, budgeted ($18k over 24 months)	Kept until the main case's ₹0 a debit (unconfirmed) is in writing
Revenue	not counted	Fund fees and lender payouts would only add to the money

ASSUMPTIONS: AFTER THE SEED

The main case after the seed: every input, and how sure we are

INPUT	MAIN CASE	BASIS	HOW SURE
Saved a day	₹100 a day, about 20 debit days a month	Our product's floor; Bachatt's average is unknown, and its own minimums are lower (₹51/₹101 a day; ₹20 for its liquid fund)	**Seed measures it (month 7)**
Still saving at 12 months	35%, then about 2% stop a month	Middle of Bachatt's 30–40% (SBI MF's ₹250 daily SIP agrees, about 38%); the drop-off moves with it: 30% ↔ 2.5%, 40% ↔ 1.5%, 45% ↔ 1.0%	**Seed measures it (month 16)**
Each daily debit, cost to us	₹0	BSE StAR MF or the fund house's own mandate: free to distributors	**Unconfirmed; in writing, month 3**
Fee on the fund we use	0.75% a year on equity, about 0.22% on debt (0.10%–0.35%); 80/20 = 0.64% blended	If one hybrid fund takes the whole ₹100 (daily minimums are about ₹100 a fund), its fee must be about 0.64% or more	**Unconfirmed; in writing, month 3**
First personal or business loan	₹70,000; repeats 10% bigger a year repaid, plus top-ups	Bachatt's number	**Seed measures it (months 7–16)**
Apply for a loan	20% of the users we can reach, a year; no yearly rise	The founders' market figure	**Seed measures it (months 7–16)**
First loans approved	20% for personal and business loans (gold 70%, home and property 45%); no yearly rise	The founders' market figure, between 11% (an app lender's new applicants) and 25% (our own past data)	**Seed measures it (months 7–16)**
Lender payout; home and property loans	2% of the loan, flat; ₹12 lakh home, ₹5 lakh against property	Middle of the market's 1–3%; market sizes	**Market**
KYC'd users who don't save	About 1.5 come with each saver, see offers and fade within about 3 months: 0.06 of a saver	Lenders rarely approve a user in their first months	**Our judgement**
Cost to win a saver	₹450 at scale + the 10% contingency = ₹495; the seed budgets ₹600 while the brand is new	₹450 is the founders' figure (they call it "fairly sorted"). At ₹600 for good (₹660 with contingency): 0.56× / 0.99×, $12.0M+	**Founders' figure; the seed measures it**
Serving a saver	₹5 support a month per saver still saving + ₹4 tech per KYC'd user reached (1.06 a saver), + 10% contingency	Our estimate	**Our judgement**
The company	20,000 online savers won a month from month 30; 1 in 10 from doorstep agents	Tax 25% after losses; no interest on cash counted	**Our plan**

Fixed by the founders on 24 October (market figures, Bachatt, or our judgement). Cards: 3% of savers still saving at month 7 take one (₹18 a saver won). Consumer-durable and two-wheeler loans sit outside the apply funnel. Not counted: insurance, recharge, bills, fixed deposits, pensions, loans against savings. A saver who stops withdraws everything. The app never holds money.
