Online, winning one daily saver costs ₹499.

THE RANGE, FROM THREE PUBLISHED SIGNALS

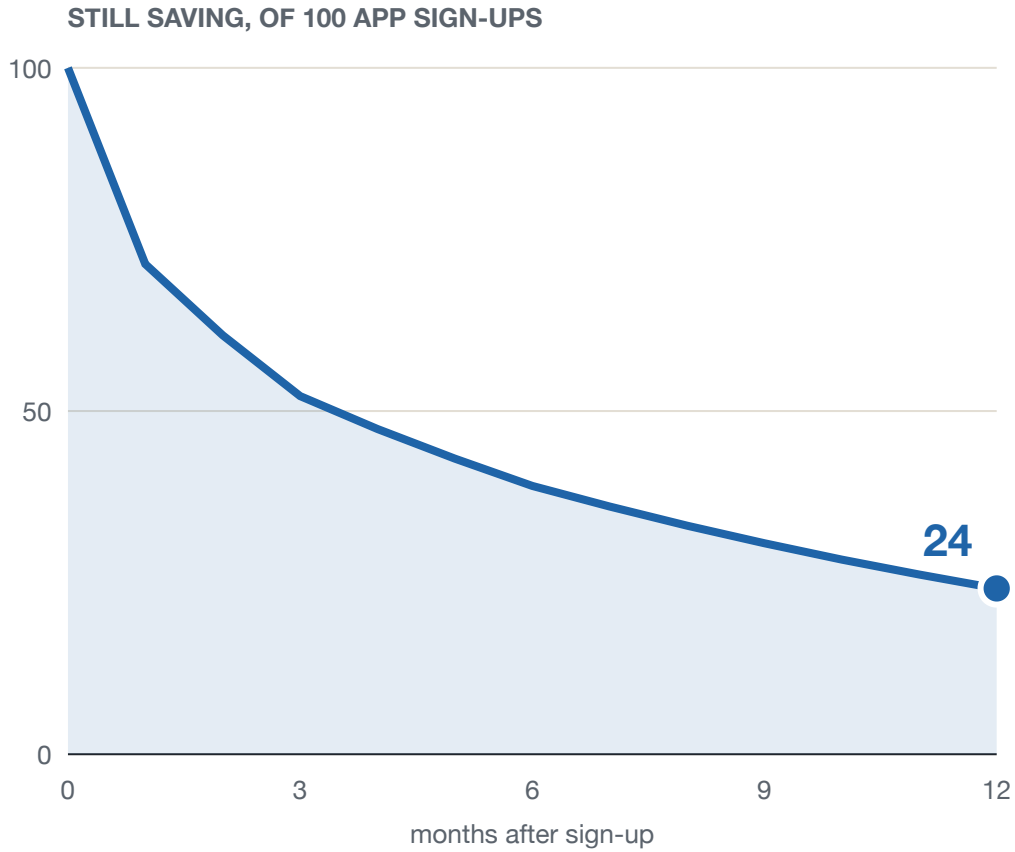

An app pays ₹499 before he saves a rupee.

Sources: A10. Table: story_unit.csv

Only 24 in 100 still save a year later.

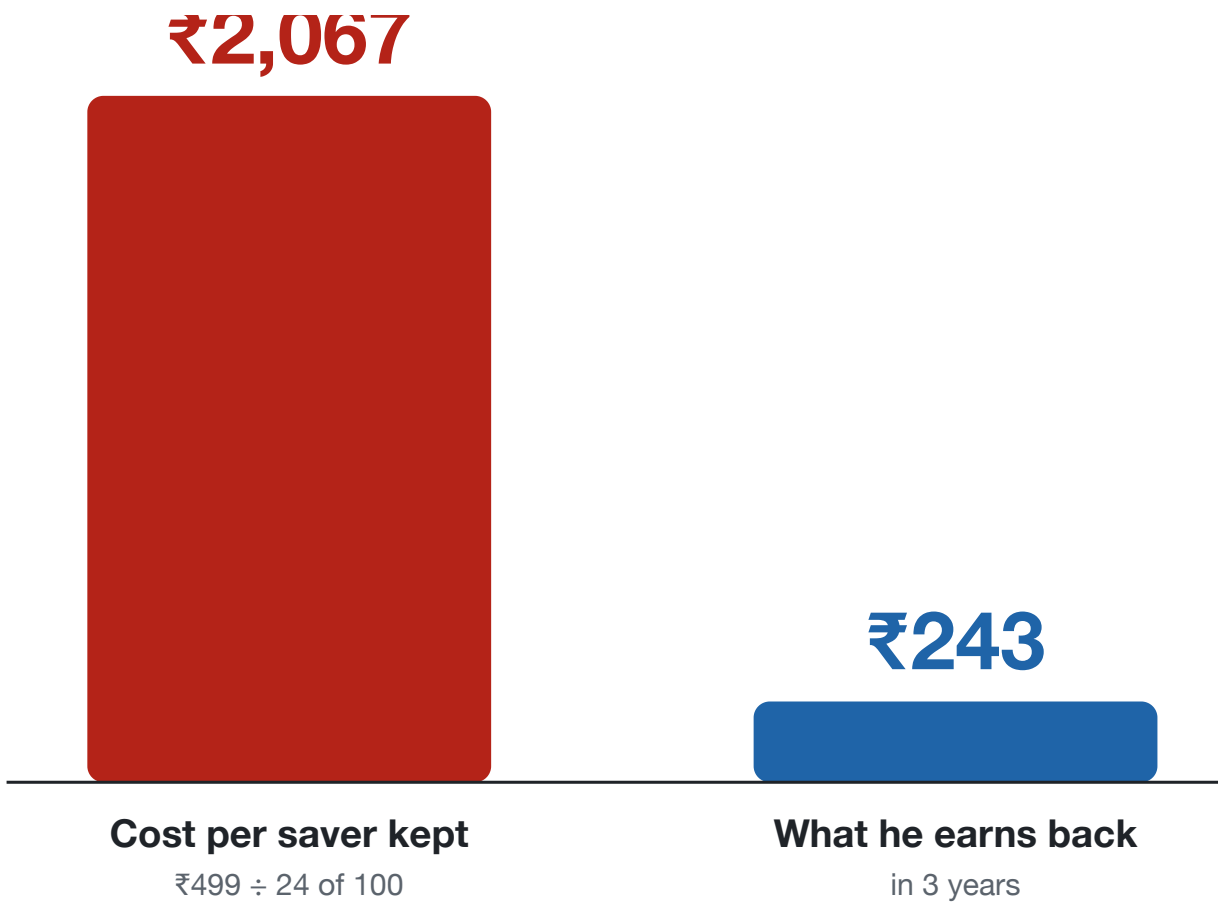

24 of 100 still save after a year

Most app savers stop within months.

Sources: A10. Tables: story_unit.csv, agent3_survival.csv

Each saver kept costs ₹2,067; the app never earns it back.

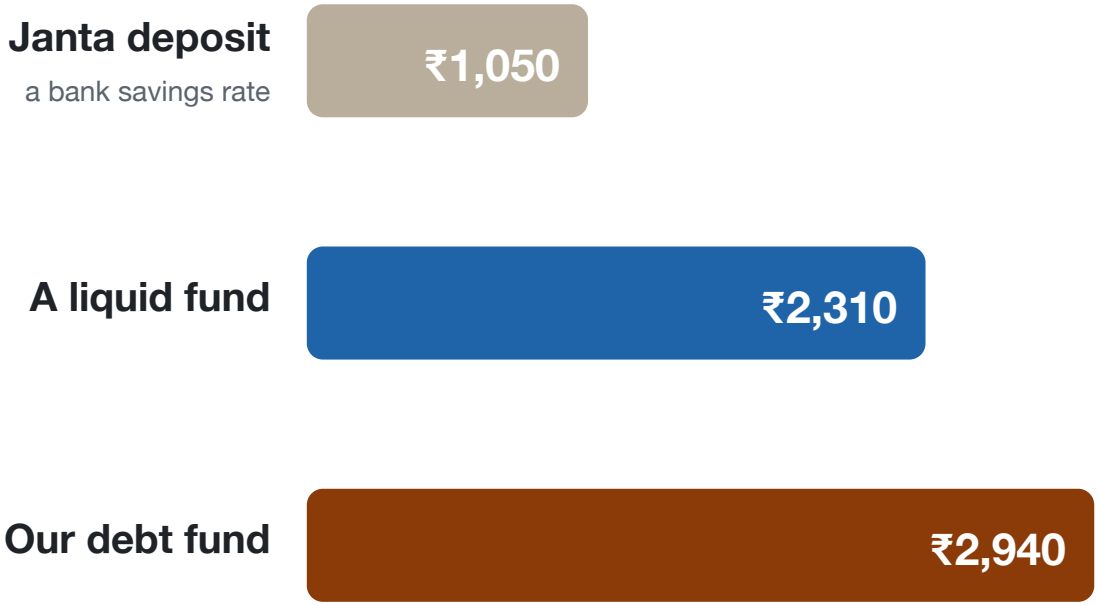

Never
earned back

Online, the numbers do not close.

Sources: A10. Table: story_unit.csv

The hook: his savings earn about 7% in a debt fund.

WHAT HIS SAVINGS EARN HIM, A YEAR

+₹1,890

more a year for him

on ₹350 a day

free to the saver

Then an agent at his shop, every 2–3 days.

Sources: A1, A4. Tables: deck_v3_hook.csv, dist_derived_v1.csv

A fleet on the street, an app in his hand.

THE FLEET

- Signs him up
- Collects every 2–3 days
- Helps collect loans

THE APP

- ~7% on savings
- UPI

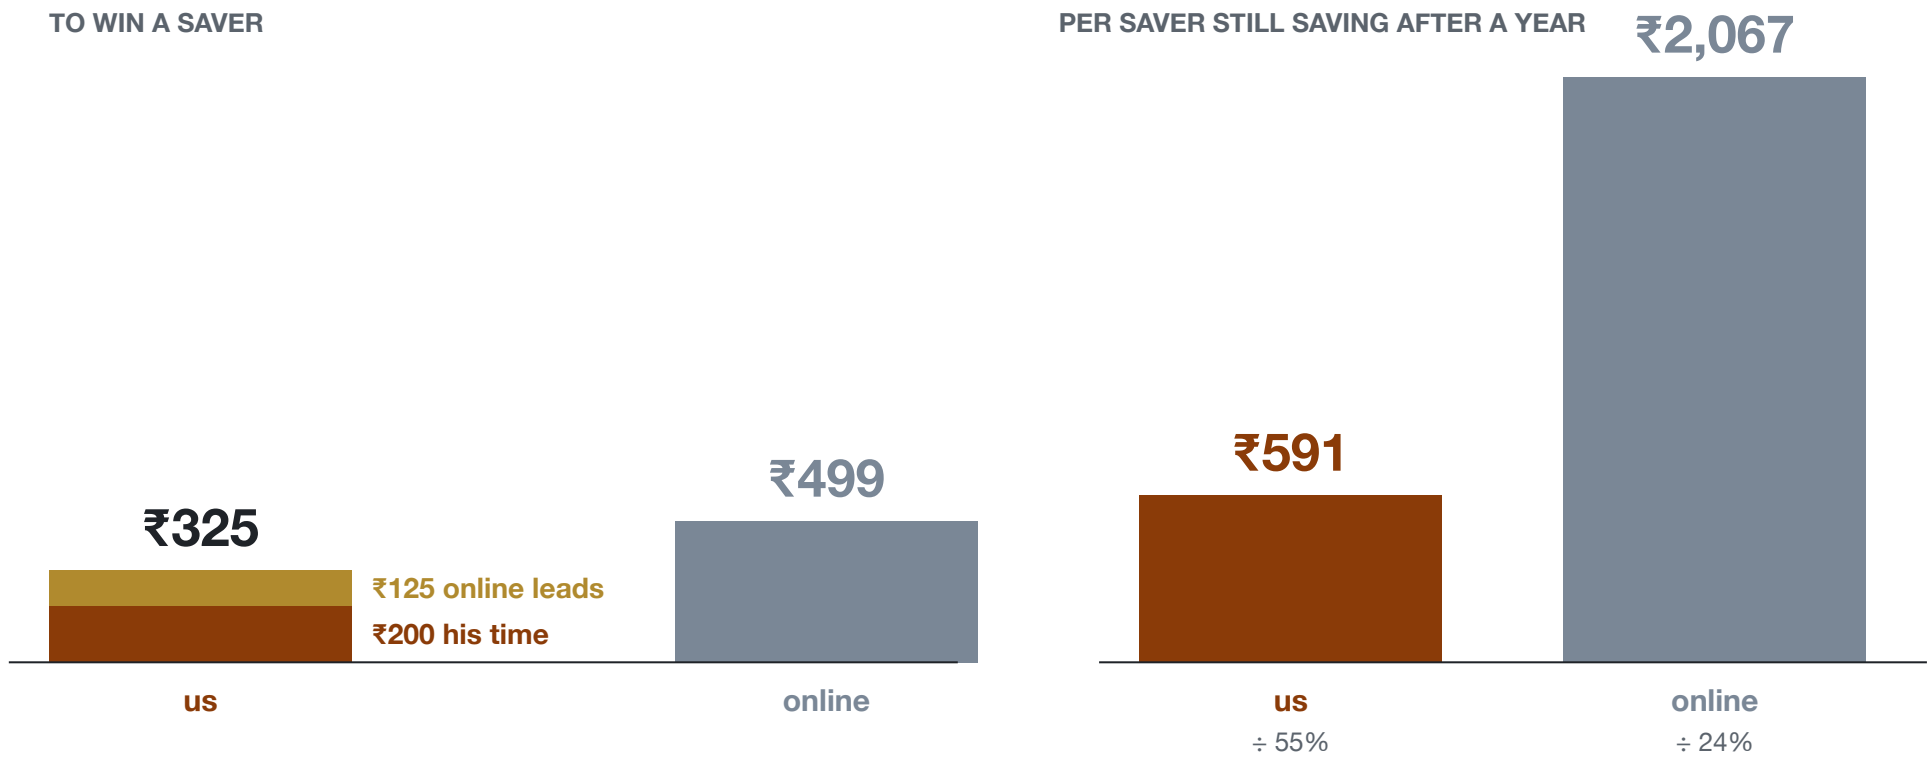

Online leads, served offline: the agent closes and serves every saver

A field-led savings fintech's agents onboard 100+ a month (PR-01)

The agent wins him; the app serves him.

Sources: A1, PR-01.

Winning a saver costs ₹325, not ₹499.

Pay: ₹20,000 + 0.25% of balance, capped at ₹10,000 a month

Kept a year, he costs ₹591, not ₹2,067.

Sources: A10, A14. Table: cohort_det_summary.csv

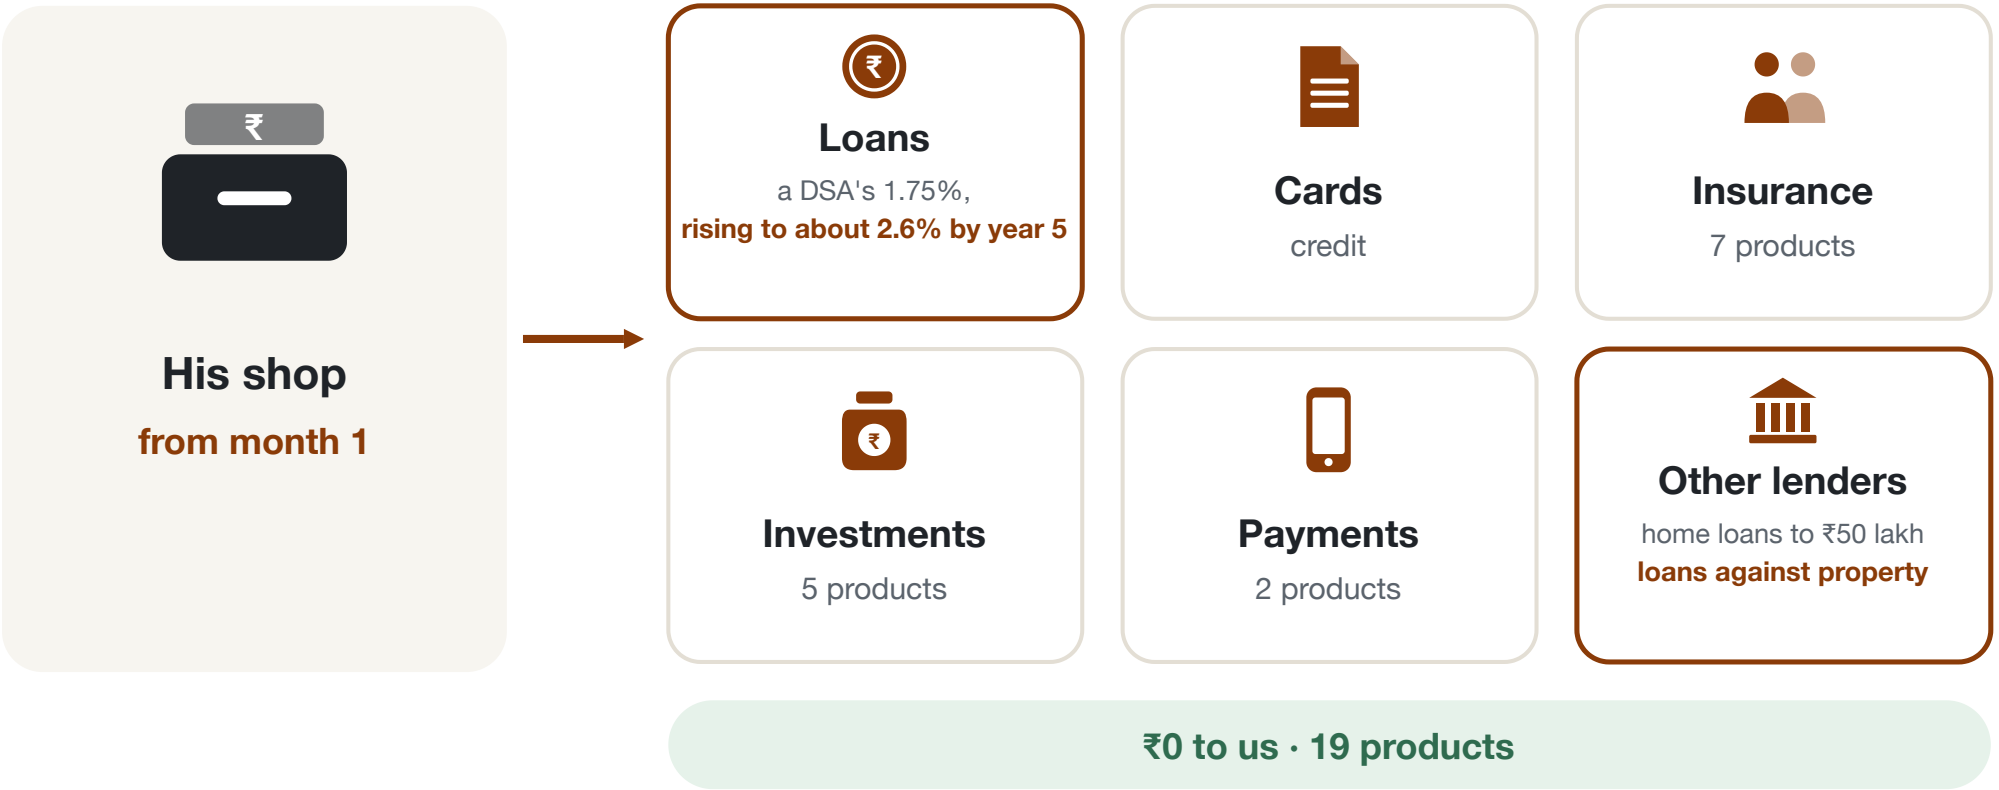

How his cash reaches his fund.

Every rupee is matched, and confirmed to him the next day.

Sources: A12 (cash route, cash cover)

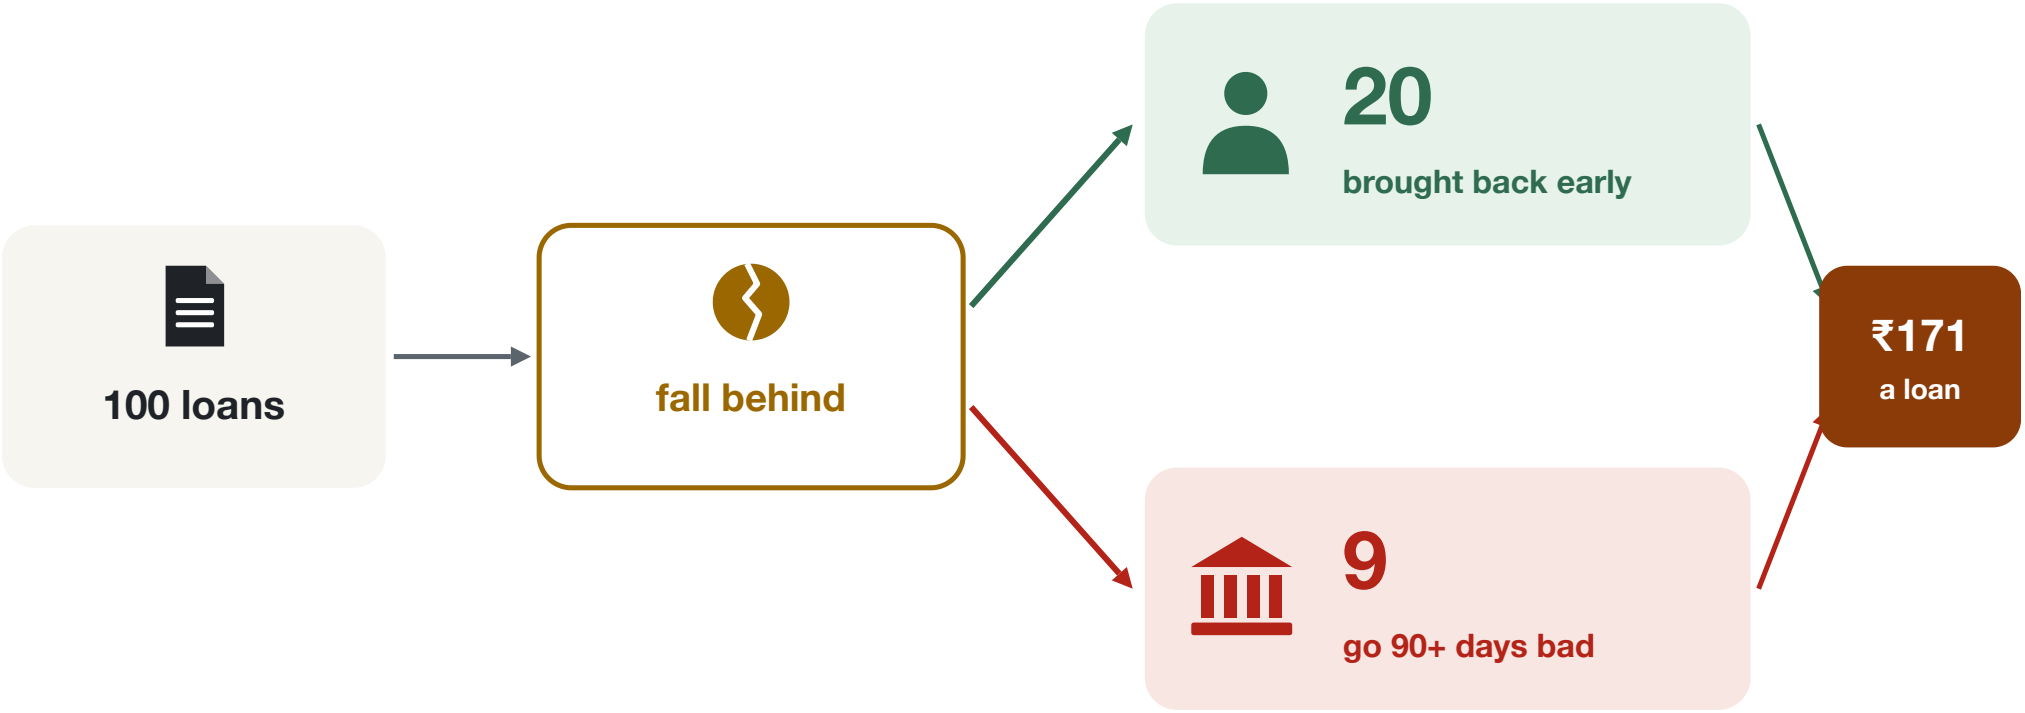

From day one, a marketplace at no cost to us.

Lenders and insurers decide; we list.

Sources: A3, A7. Table: dist_agreed_v1.csv

The agent knows him, so he helps collect.

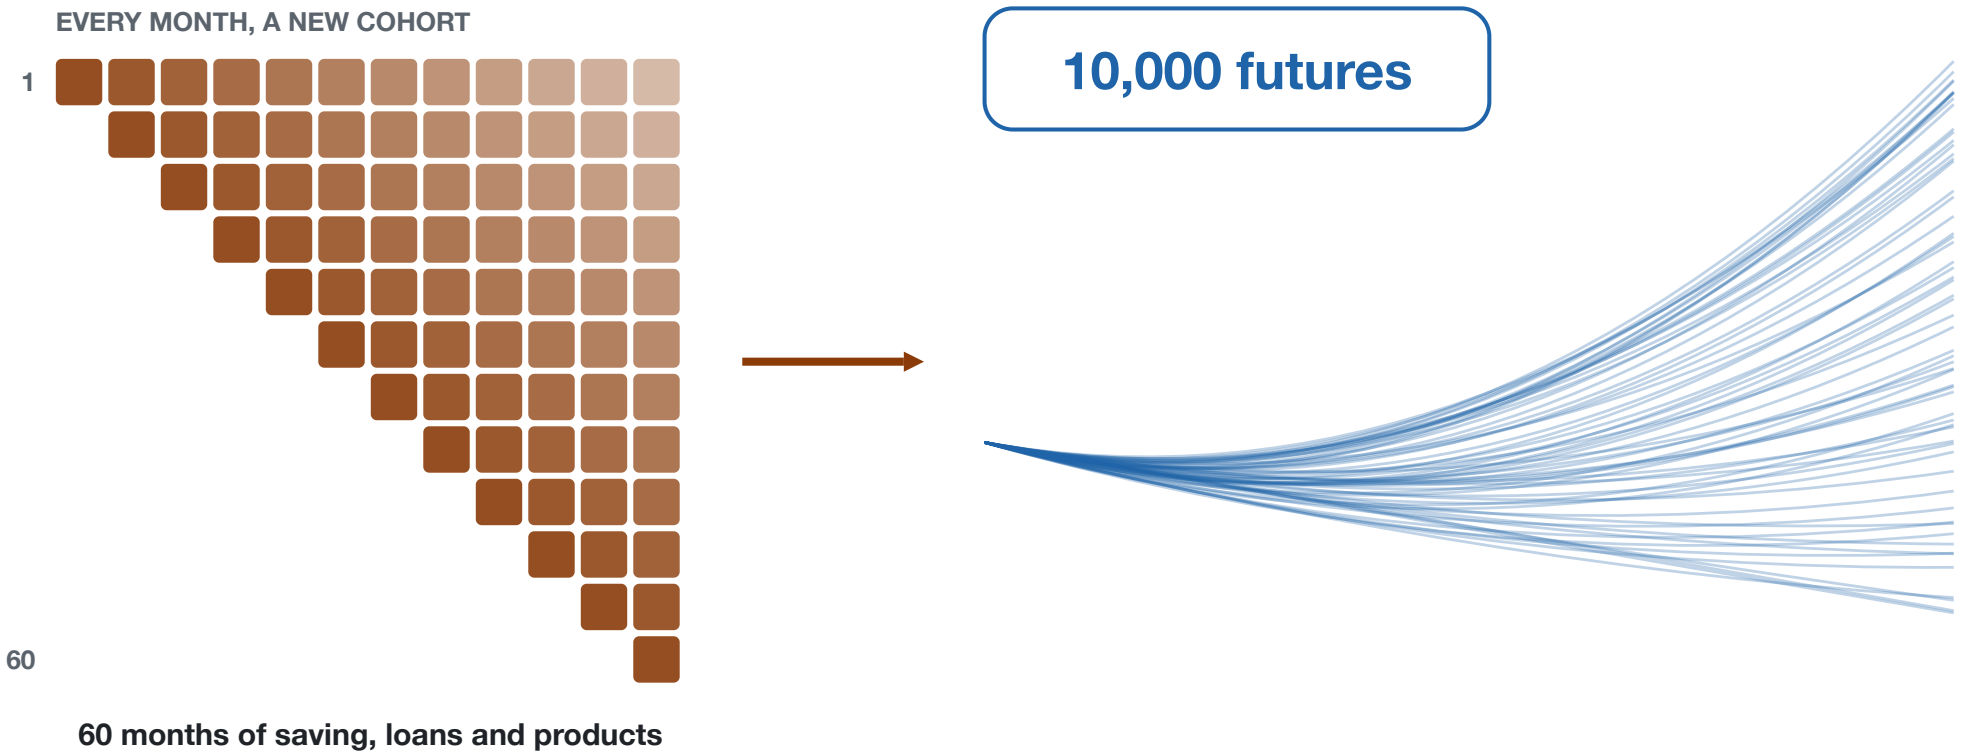

Worst case: losses of 5%, Paytm's level

Collection fees come from bringing late loans back.

Sources: A8. Tables: dist_derived_v1.csv, dist_agreed_v1.csv

We modelled every monthly cohort, 10,000 times.

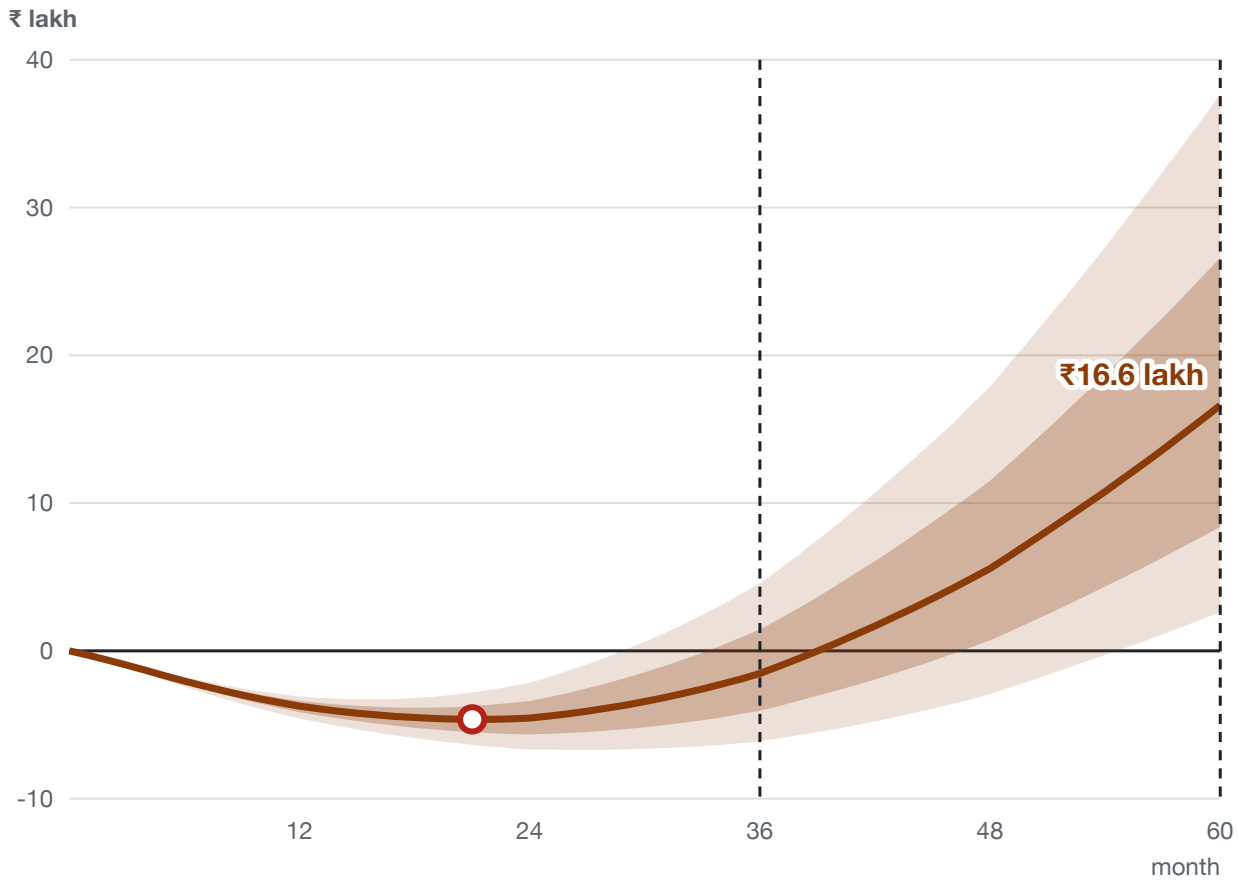

Every input is a distribution (A1–A3)

One agent, 60 monthly cohorts, every input drawn each time.

Running at scale

150 cities · 382 hires a month · 535 central staff

Valuation is judgement

20 × ARR and 0.45 × AUM: one comparable

The tails

cash lasts to month 96 in 84%; a bad tenth needs ₹246 crore

Any one can stop the track.

Tables: unicorn_yearly.csv, unicorn_mc_summary.csv

The other road: profitable by year 5, far smaller.

	UNICORN TRACK	PROFITABLE, 200 AGENTS
Money raised by month 60	₹1,308 crore	₹43 crore
Savers at month 60	1.0 crore	3.9 lakh
EBITDA positive from	month 65	month 51
0.45 × AUM at month 60	₹22,551 crore	₹1,073 crore

The 200-agent plan raises far less and stays small.

Tables: growth_frontier.csv, unicorn_yearly.csv

The plan in one line: prove one agent, then the unicorn track.

Prove one agent

- one salaried agent, 12 months
- stop below 44 sign-ups a month
- or 26% still saving

The unicorn track

- 300 agents by month 18, +200 a month
- ₹1,308 crore raised in 6 rounds
- unicorn on paper at month 60

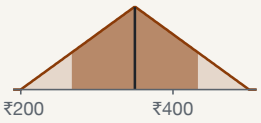

One agent: 9 of 10 futures in profit by month 60.

19 products: about ₹311 a saver a year, booked

BOOKED, A SAVER A YEAR

₹311

8 in 10: ₹234–421

WHO QUALIFIES FOR A HOME LOAN

₹25 lakh home loan, 20 years at 9%:
EMI about ₹22,500 a month,
needs about ₹45,000 of income.
Our interview: ₹20k–₹40k (A11).
Family income counts (operator).

Tables: cohort_mc_crosssell.csv (median of the draws), deck_v3_housing.csv; interview IV-04

A8 APPENDIX · COLLECTIONS

Collection fees, by how late the loan is

31–90 days behind: the agent brings him back

20 in 100 loans × ₹450 a case

about 9 months after the loan

₹99 a loan

90+ days bad: part is recovered

9.6 in 100 loans × 35% recovered × fee ₹2,500

about 18 months after the loan

₹90 a loan

LOSSES FALL ON THE LENDER

likely 3%, worst 5%

Paytm's 4.5–5% is our worst case

IN THE PILOT YEAR

₹27

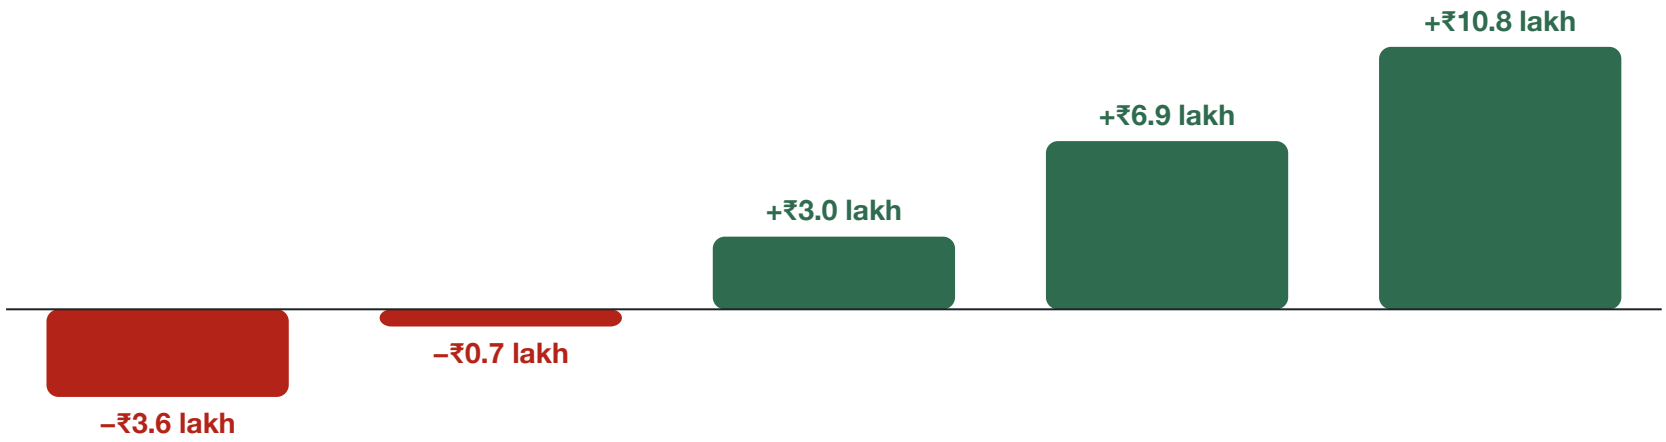

collection fees are mostly year-2 money

Tables: cohort_mc_summary.csv, dist_agreed_v1.csv

A9 APPENDIX · YEAR BY YEAR

Year by year for one agent, at the likely values

ONE AGENT, LIKELY VALUES: P&L EACH YEAR

	Year 1	Year 2	Year 3	Year 4	Year 5
Savers at year end	833	1,402	1,797	2,054	2,238
Loans made	6	29	53	75	97
Income	₹1.3 lakh	₹5.5 lakh	₹10.0 lakh	₹14.5 lakh	₹18.7 lakh
Cost	₹4.9 lakh	₹6.2 lakh	₹7.0 lakh	₹7.5 lakh	₹7.9 lakh
Cumulative P&L	–₹3.6 lakh	–₹4.3 lakh	–₹1.3 lakh	₹5.6 lakh	₹16.4 lakh

Table: cohort_det_monthly.csv

A10 APPENDIX · ONLINE COST METHOD

How we estimate the online cost to win: ₹499 a saver

WHAT WE CAN SEE PUBLISHED

Groww
₹796–1,374 a customer, with 83% coming free

Finance-app installs
₹100–300 each

Jar, Stable Money
₹249 a saver, only if half of sign-ups save

for shopkeepers:
the same, × 1.1
our judgement: none is published

COST TO WIN A SAVER

EACH SAVER STILL SAVING AFTER A YEAR

÷ 24.2 of 100 still saving after a year
(our evidence curve for an app)

Tables: distributions.csv, story_unit.csv

A11 APPENDIX · THE ONE INTERVIEW

One janta agent, 15 October 2026

QUESTION	A JANTA AGENT'S ANSWER (15 OCT 2026)
Book size	**200 to 400 customers**
Daily deposit	**₹200 to 500**
Monthly income of a typical customer	**₹20,000 to 40,000**
Have UPI (of 10)	**9 or 10**
Of every ₹100 collected, in cash	**90 or more**
Why cash despite UPI	**Habit**
What customers need most	**A loan**
How long most customers have saved with him	**Over 5 years**
New customers last month / closed last month	**6 to 10 / 6 to 10**
Pay	**Fixed salary ₹15,000-25,000; under 2% on collections**

Research: the interview notes (identity withheld)

A12 APPENDIX · WHAT IS LEFT OUT

What is left out, and the open questions

Tele-sales and AI support

inside the ₹5 running cost

Managers

the founder in the pilot; team leads at scale are not counted

Cash route

needs a legal opinion

The customer app's build

not yet costed

Partners' licences

our own fund-distributor code (ARN); insurance through a broker partner (we keep about 75%); lenders' direct sourcing partner

Rules risks

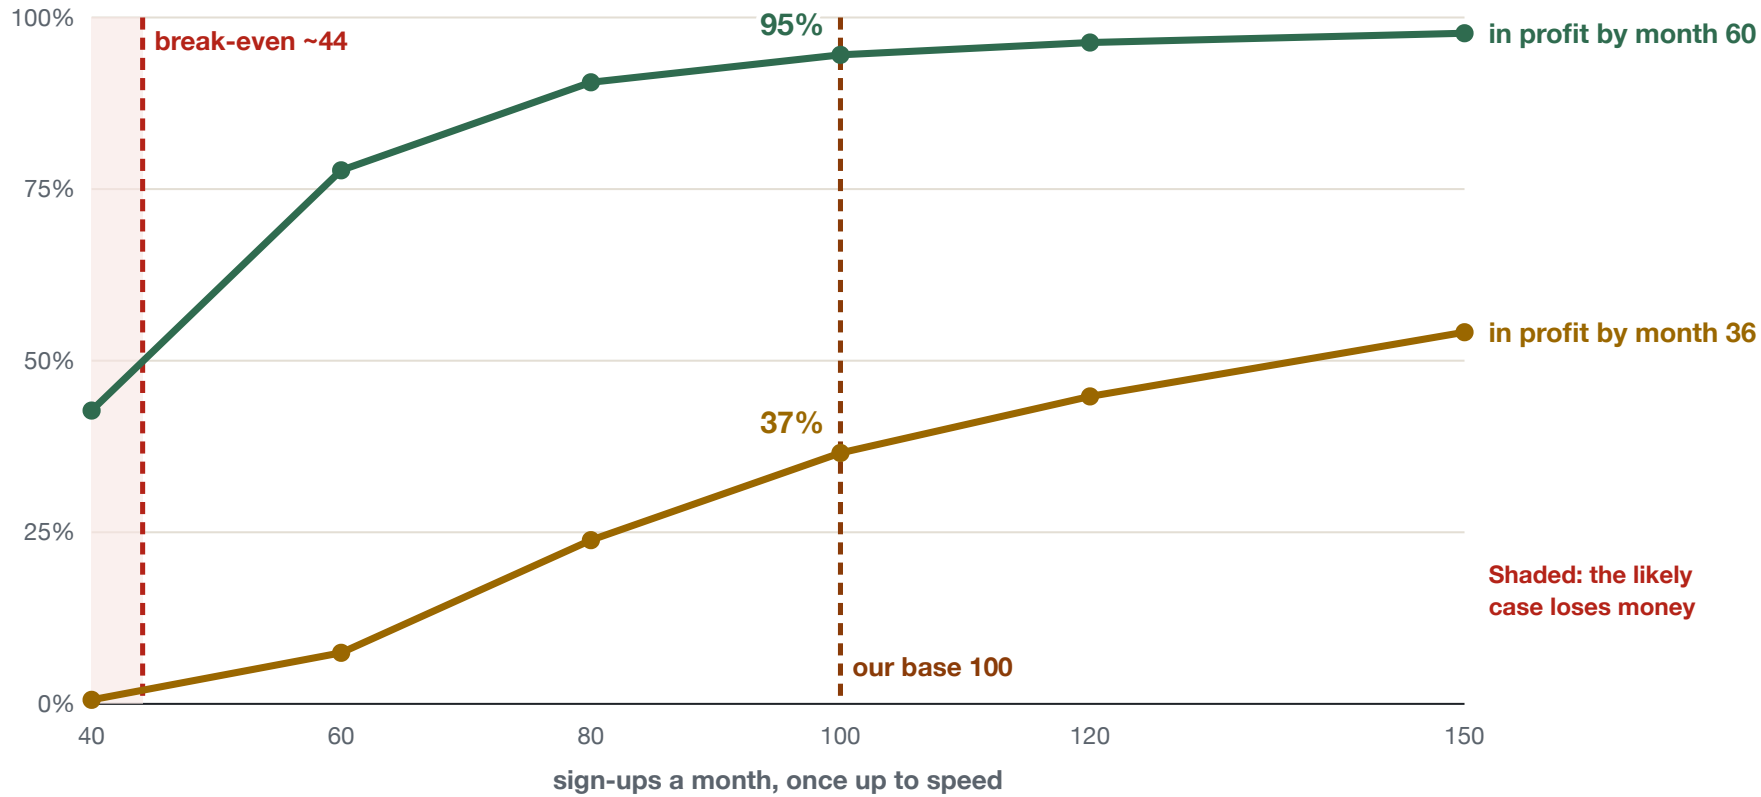

IRDAI caps (in the base), SEBI on digital gold

Cash cover

fidelity and cash-in-transit insurance about ₹1,000 per agent a month (in the numbers)

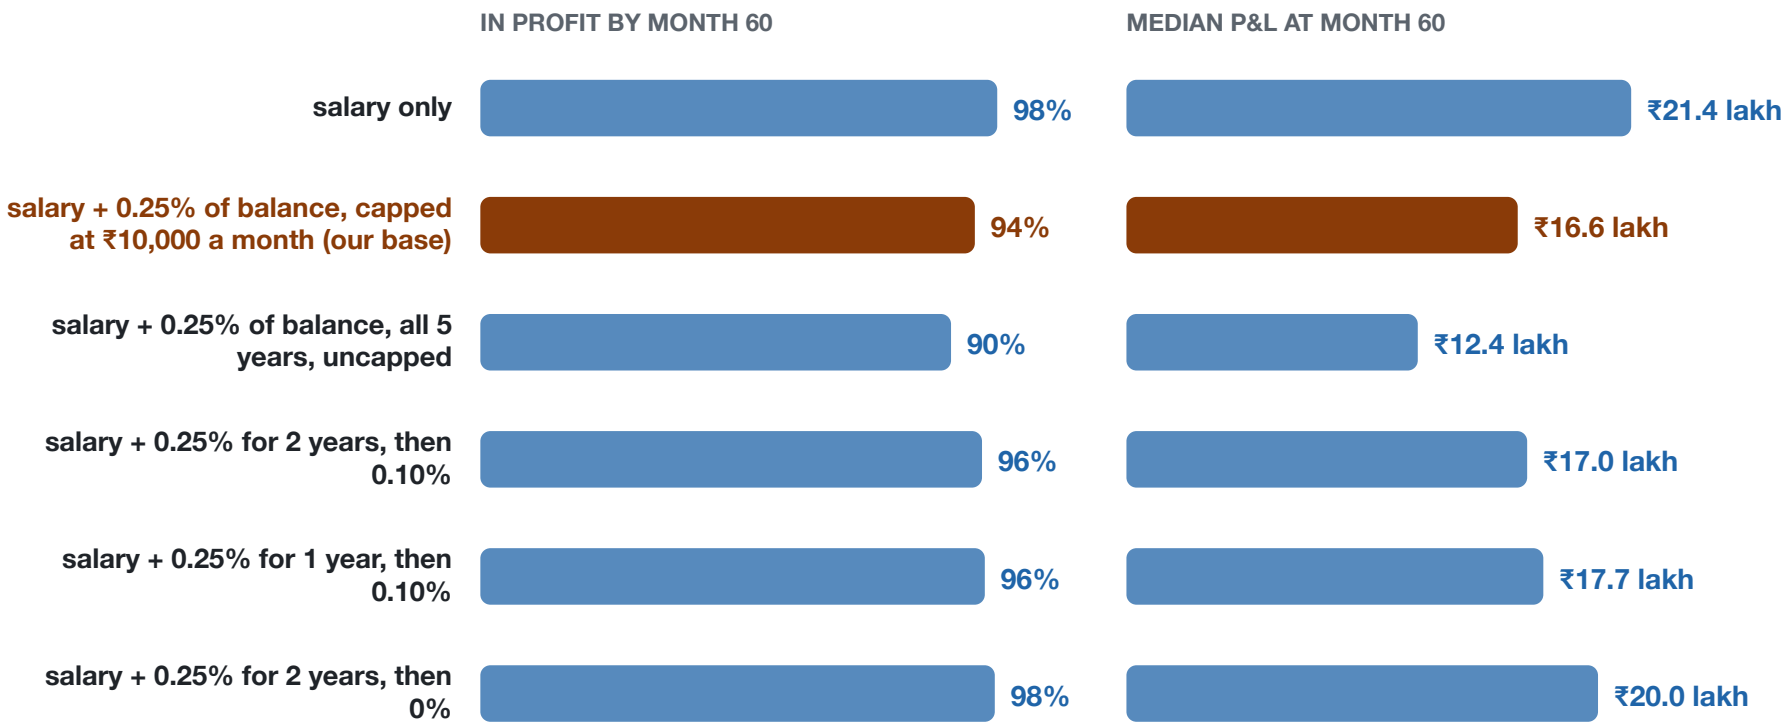

Change notes, 16 Oct (rounds 5 and 6)

How many sign-ups a month?

Tables: cohort_signups_sweep.csv (a Monte Carlo at each point), cohort_signups_sweep_likely.csv (likely values)

Paying the agent

With the cap, 0.10% after year 5 saves nothing: it pays ₹500 more at month 60

Our base pays him about ₹4.9 lakh over 5 years on top of his salary (median).

Table: cohort_incentive_sweep.csv (the base inputs, ways to pay him)

Rounds, valuations and the cap table

Round	Month	Raised	Pre-money	Post-money	Dilution	Founders	ESOP	Investors	Priced on

Table: unicorn_monthly.csv

Company cost assumptions

Input	Value	
Hiring plan		
Fleet		
Agents who leave a year (replaced the next month; the new agent inherits the book)	**30%**	a year
Savers who stop when their agent is replaced	**10%**	share
Acquisition share of an agent's cost, his months 1-12	**50%**	share
Acquisition share at his month 60 (straight line from month 12)	**20%**	share
Months the early share holds	**12**	months
Cities and field management		
Cities from month 1	**1**	cities
Second city from month	**9**	month
Cities from then	**2**	cities
Third city from month (then one per N agents)	**18**	month
Cities from then (at least)	**3**	cities
Agents per city after that	**50**	agents
City launch cost, once per new city	**₹3,00,000**	
City office a month	**₹50,000**	a month
City manager pay a month (one per city)	**₹80,000**	a month
Team lead pay a month	**₹40,000**	a month
Agents per team lead (rounded up)	**10**	agents
Central team: scaling rules		
Engineers and ops executives scale only after month	**18**	month
...beyond this many agents	**60**	agents
...+1 each per this many agents (rounded down)	**50**	agents
Risk and fraud lead pay a month	**₹1,50,000**	a month
...from the month the fleet reaches	**100**	agents
Cash reconciliation executive pay a month	**₹35,000**	a month
...one per this many agents (rounded up)	**50**	agents
HR and recruiting executive pay a month	**₹50,000**	a month
...one per this many agents (rounded up)	**100**	agents
Customer support lead pay a month	**₹60,000**	a month
...from the month savers reach	**50000**	savers
Lean hold: no engineer/ops scale-ups, risk lead or support lead until EBITDA first turns positive (1 = on)	**1**	1/0
Pay extras		

Input	Value	
Statutory on central and field-management pay	**10%**	share
Pay rise each company year (everyone, agents and the cap too)	**7%**	a year
Laptop per central hire (capitalised)	**₹60,000**	
Tools per central person a month	**₹1,000**	a month
Agent statutory a month	**₹3,000**	a month
Hiring and kit per hire (replacements too)	**₹12,000**	
Cash cover: share of his cash collected, if above the flat cover	**0.015%**	share
App, licences, overheads and small costs		
App cloud, SMS and KYC tools a month	**₹1,50,000**	a month
App integrations, months 1-3 (capitalised)	**₹15,00,000**	
Depreciation, straight line over	**36**	months
Licences and setup, one-time (month 1)	**₹7,50,000**	
Licences and compliance a year	**₹10,00,000**	a year
Head office a month	**₹1,50,000**	a month
Travel a month	**₹1,00,000**	a month
Brand marketing a month	**₹2,00,000**	a month
Bureau pull per loan application and top-up	**₹25**	
Fraud provision on cash collected	**0.05%**	share
Finance and funding		
Income tax after past losses	**25%**	share
Contingency on every expensed cost	**10%**	share
Interest on cash at the start of each month	**5.5%**	a year
Central team: the launch team (pay a month; count from a month, then a later count)		
Founders	**₹1,50,000**	Founders
Tech lead	**₹2,50,000**	Technology
Engineers	**₹1,20,000**	Technology
Product and design	**₹1,50,000**	Technology
Compliance and operations head	**₹1,50,000**	Compliance and operations
Operations executives	**₹40,000**	Compliance and operations
Growth and marketing	**₹1,20,000**	Growth and marketing
Finance and admin	**₹70,000**	Finance and admin
