Save91 / SaveMore

Working name, to be finalised

Daily saving, online first

For India's self-employed: ₹100 a day into funds in the saver's own name, and the longer they save, the better their loan offer. 9 in 10 savers online, 1 in 10 at the doorstep. Business model v4.

October 2026 · Confidential · Piyush (CEO) and Sandeep (CPTO)

1.75× LTV/CAC

one online saver in the main case: ₹495 to win (measured), ₹866 back over five years, paid back in month 39

Month 63

operating profit (EBITDA) turns positive in the main case, $4.7M in all at 20,000 online savers a month

23% chance of 3×

across 1,000 what-ifs on the value of a saver; 7.7× only if every loan target holds (month 33, $1.8M)

$0.5M seed

measures the five numbers that decide where LTV/CAC lands, and how much to raise next

One model: monthly groups of savers, stacked into a company over 8 years. The cost to win is measured; the value of a saver is not, so the plan is built on the median of 1,000 what-ifs and shows the company at each LTV/CAC (page 8).

THE SAVER'S PROBLEM, NOT OURS

Anyone can sign up savers; a product built for how they save and borrow is still missing, and the market is big enough for more than one winner

1 Sold on “believe me”

- ✕ An investment person they know picks the product. Nothing is written down.
- ✓ A written rule they can see: why this fund, in one sentence.

2 Can't start small alone

- ✕ A small instalment happens today because someone comes to collect it.
- ✓ ₹100 a day by UPI Autopay, set up in minutes; an agent for 1 in 10.

3 Forgotten after joining

- ✕ Nobody comes back to ask what else the saver needs.
- ✓ Streaks, nudges and an AI money coach in the app.

4 Saves a little, then stops

- ✕ Some keep saving; many drop off.
- ✓ Saving improves the offer: the longer the streak, the better the loan limit and rate (our proposal).

What savers think the product is: a wallet they save into and then borrow from, an overdraft-like line. Our answer keeps the money in funds in the saver's own name (we never hold it) and lets saving improve the loan offer.

Sources: practitioner conversations, 17–18 Oct 2026 (customer problem notes; the wallet reading is the founders' own).

WHAT WE BUILD

Four releases in 18 months; 9 in 10 savers come online, 1 in 10 through a doorstep agent

1 Save
Months 1–3 · live in month 4

- ✓ Sign-up with e-KYC and a bank check
- ✓ Daily saving from ₹100 into equity and debt funds (80/20)
- ✓ One UPI Autopay mandate
- ✓ Withdraw any day: back in 1–3 working days; equity funds may charge an exit fee in year 1

2 Habit
Months 4–9

- ✓ Goals, streaks and nudges
- ✓ Referrals (no cashback, by rule)
- ✓ Doorstep agent app for the pilot
- ✓ Savings analytics

3 Offers
Months 7–12

- ✓ Loan offers for users who opt in; saving improves them
- ✓ Insurance via a broker (fixed fee)
- ✓ Credit cards from issuers
- ✓ Shown only when relevant

4 Score and plan
Months 10–18

- ✓ Savings-record score
- ✓ AI money coach
- ✓ Wallet-like view; money stays in funds
- ✓ Better offers for steady savers

WHERE SAVERS COME FROM

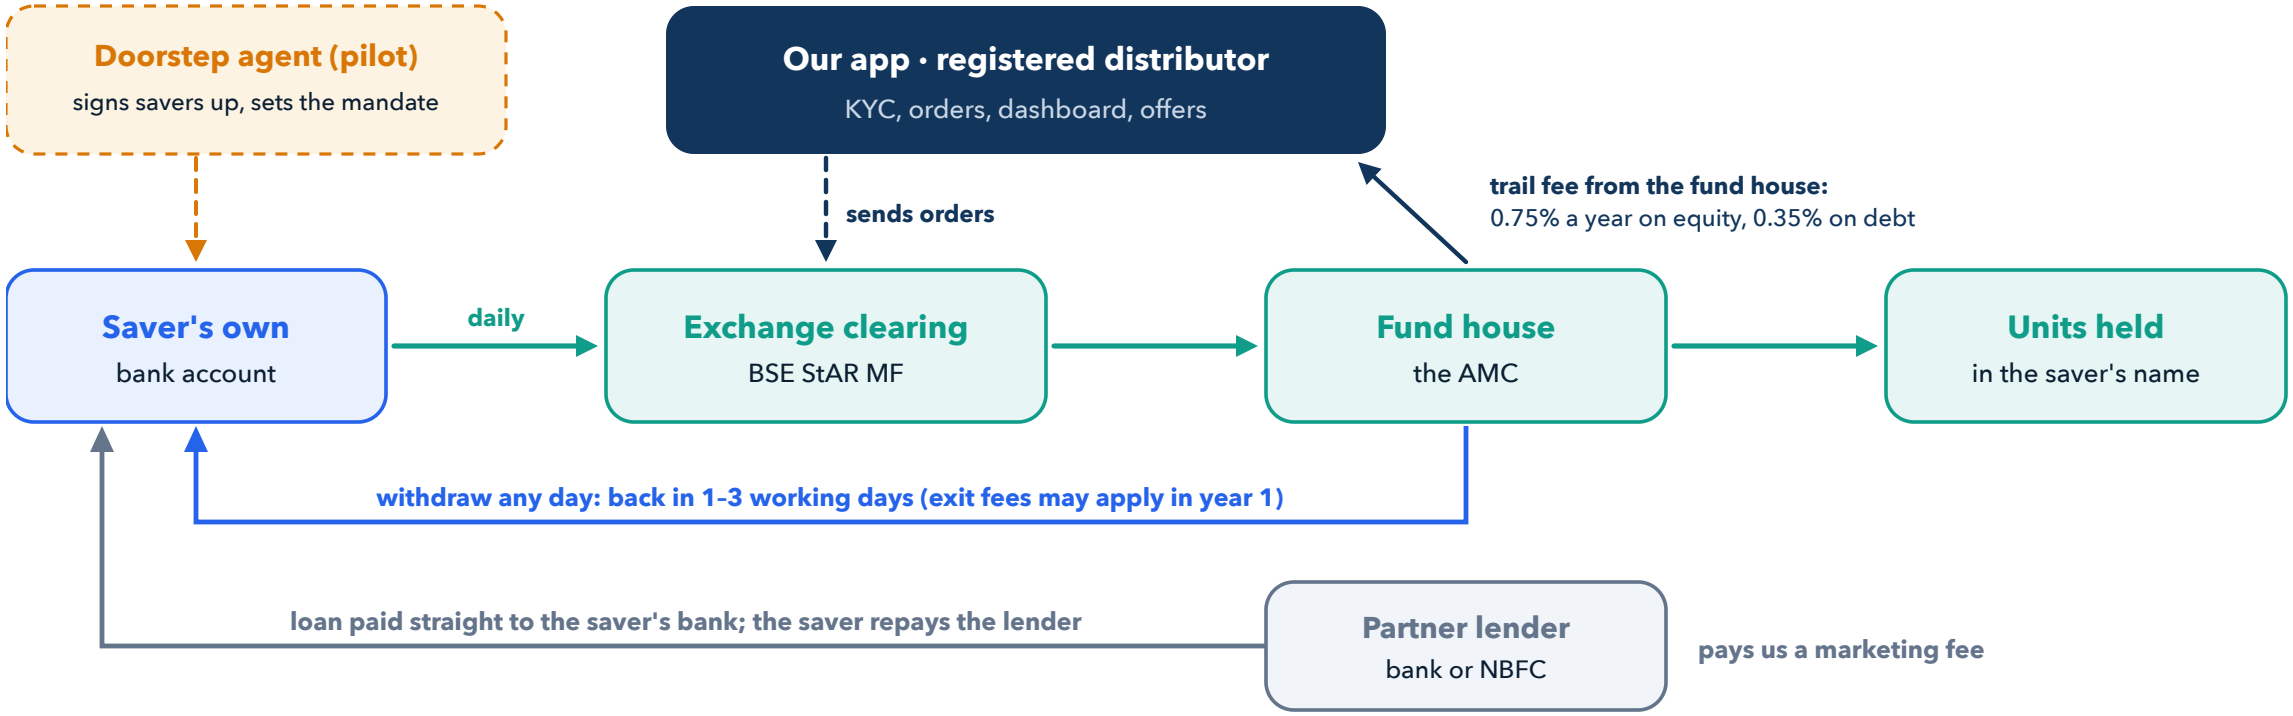

ONLINE • 90% OF SAVERS
app, referrals and performance ads. Cost to win (marketing + KYC per saver who starts saving): ₹600 in the seed, ₹450 after (₹300–600)

DOORSTEP 10%

Doorstep agents sign savers up and set the UPI mandate; they never handle cash. The pilot runs in NCR with two agents; online is pan-India.

THE MONEY FLOW

Money moves from the saver's bank to the fund and back, never through us

In the saver's name
Units sit with the fund house, registered to the saver.

Never through us
We hold no customer money, ever.

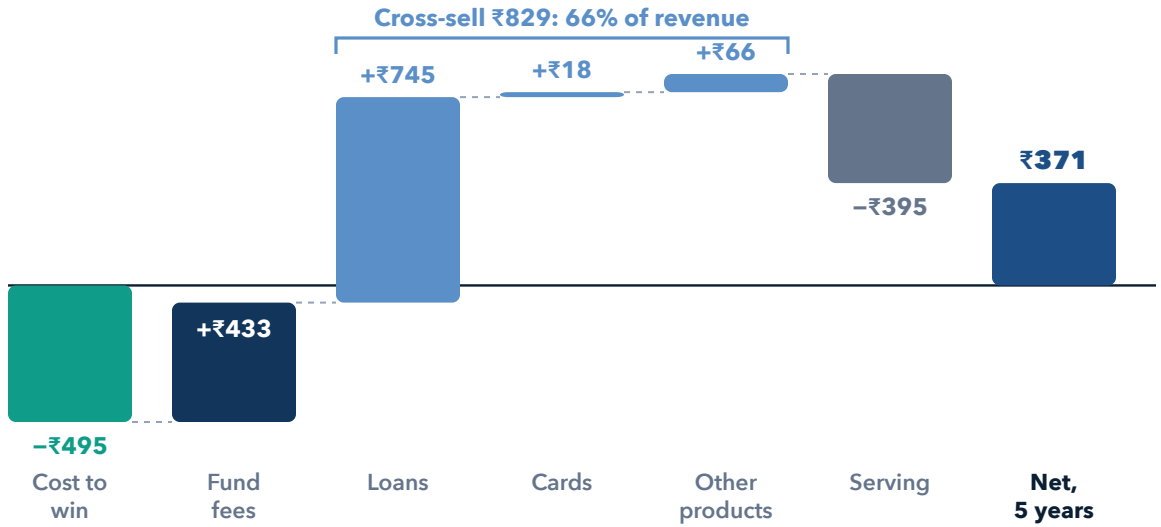

Paid by partners
Fund houses and lenders pay us. A regular plan costs the saver about 0.5–1% a year more than a direct plan; we say so up front.

SEBI: payments come from the investor's own account. BSE StAR MF: no transaction fee for distributors. AMC = fund house; NBFC = non-bank lender.

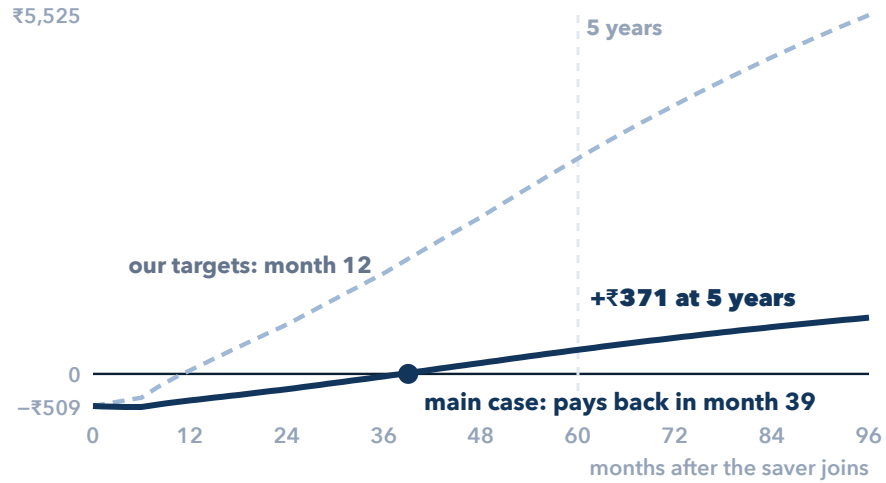

LTV / CAC, THE MAIN CASE

A saver won online costs ₹495 and returns ₹866 over five years in the main case: 1.75× LTV/CAC, paid back in month 39

ONE ONLINE SAVER WON, FIRST 5 YEARS (₹)

WHEN IT PAYS BACK: CUMULATIVE ₹ PER SAVER WON

1.75× in 5 years, 2.8× in 8

LTV/CAC = what a saver brings in, less the cost of serving them, divided by the ₹495 it cost to win them. Undiscounted.

Loans are 59% of revenue

Lender fees of ₹745 on top of ₹433 of fund fees. Saving alone about covers its serving cost; the loans make the return.

At our targets: 7.7×

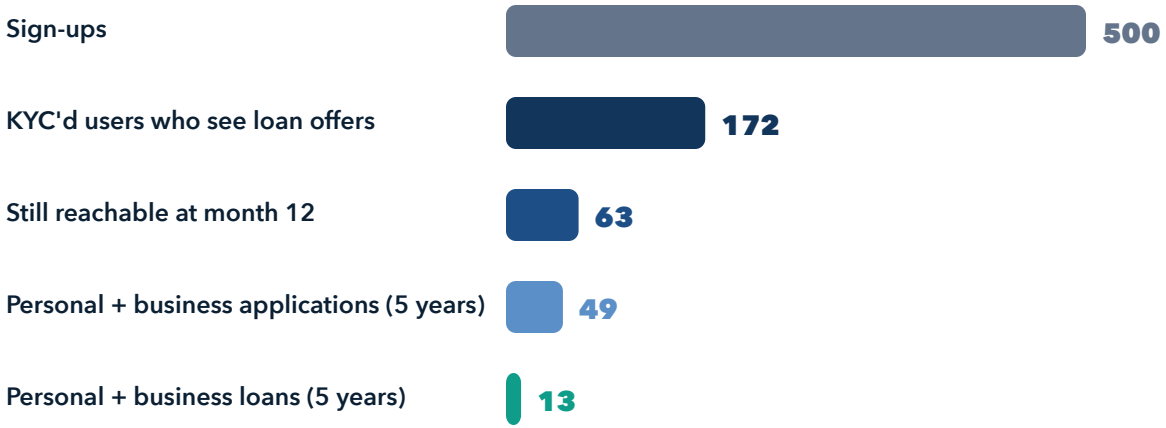

Paid back in month 12 if every loan target holds at once. In the main case every input sits 48% of the way from today's market to its target.

Main case: every unmeasured input 48% of the way from today's market to our target, which gives the Monte Carlo median. ₹100 a day; 80/20 equity and debt funds. Serving = ₹5 support, ₹4 tech for each KYC'd user reached and ₹2 a weekly debit, a month while saving; the cost to win includes our 10% contingency. Not in this view: the company's fixed costs (team, office, brand).

THE LOAN FUNNEL, MAIN CASE

Main case: of 100 online savers won, 172 KYC'd users see loan offers; 25 loans worth ₹57 lakh follow in five years, earning us ₹745 a saver

PER 100 ONLINE SAVERS WON, FIRST 5 YEARS

LOAN TYPE	LOANS PER 100 SAVERS WON	AVERAGE LOAN	OUR PAYOUT	OUR FEES A SAVER WON
Personal + business	13.5	₹1,65,999	2%	₹490
Gold	6.8	₹1,00,000	0.5%	₹34
Loan against property	0.9	₹14,56,800	1%	₹135
Home	0.6	₹20,61,120	0.5%	₹64
Consumer durable	2.8	₹20,000	2%	₹11
Two-wheeler / e-rickshaw	0.7	₹1,50,000	1%	₹11
All loans	**25**			**₹745**

KYC'd users, from day 1

Each online saver comes with 5 sign-ups and half finish KYC. In the main case 1.7 people see loan offers for every saver won (our target 2.5; savers only, 1).

27% apply a year, 25% approved

The main case; our targets are 35% and 30%. About 1 in 15 reachable users gets a first loan each year.

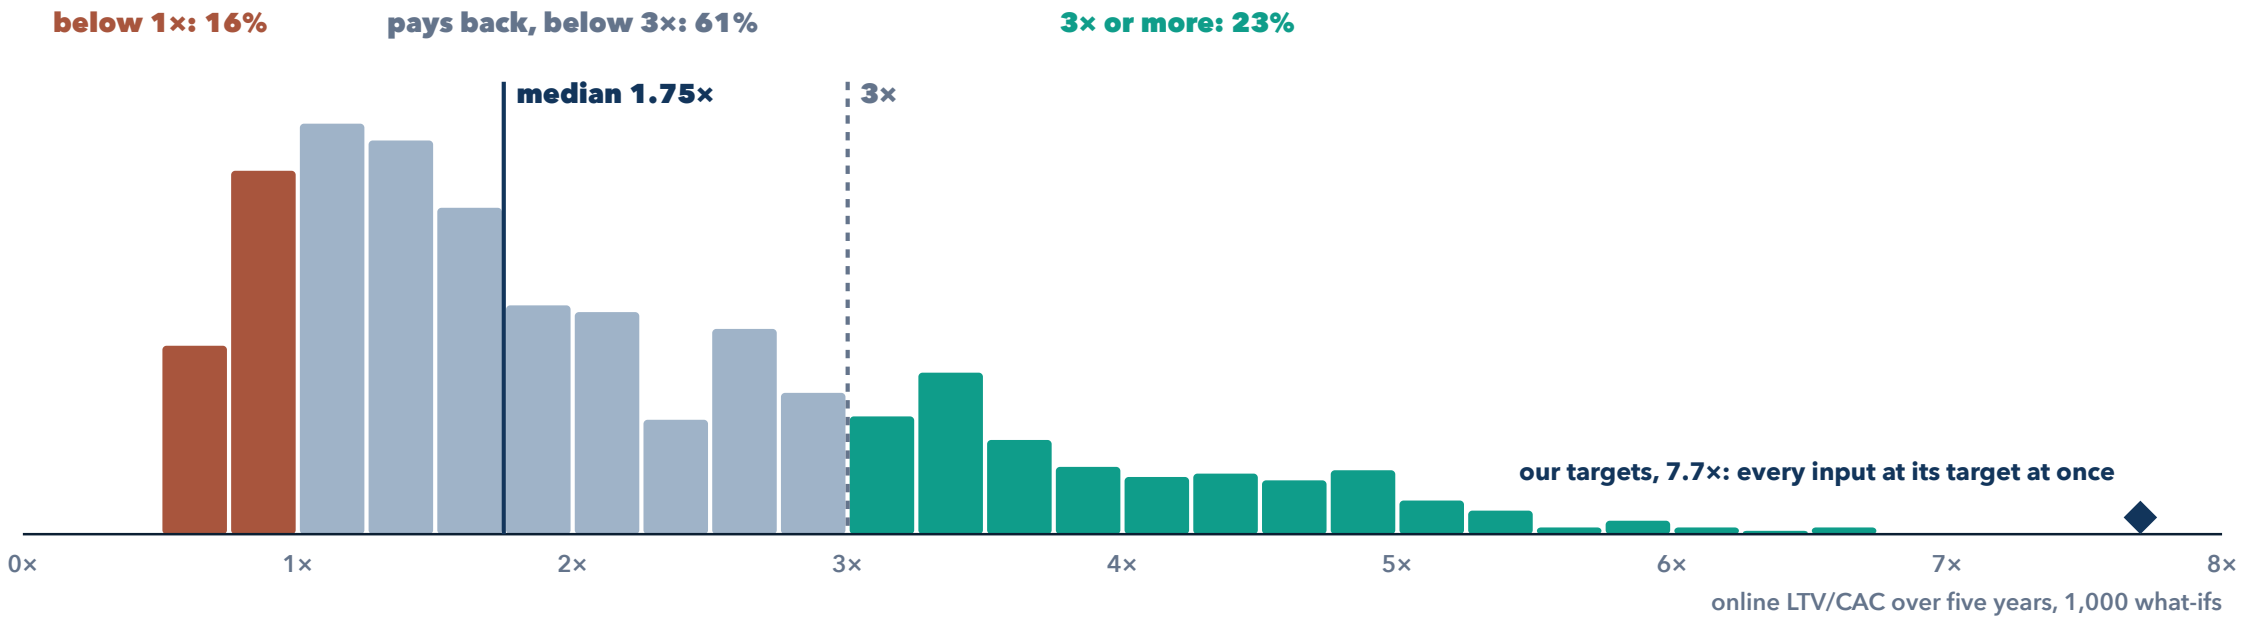

We earn as a lender's referral agent (DSA)

2% rising to 2.5% on personal and business loans in the main case (target 2% rising to 3%); 0.5–1% on gold, property and home loans.

Main case: every loan input 48% of the way from today's market to our target. Personal + business loans include top-ups. Applications split 70% personal or business, 15% gold, 3% property, 2% home (10% against savings: tiny, not counted). Benchmarks for every input are in A15.

THE ODDS

With the cost to win fixed at ₹495, the median saver returns 1.75×; 23% of the what-ifs reach 3× and 16% do not pay back in five years

Cost to win is known

₹600 in the seed and ₹450 after, measured on our own funnel, plus our 10% contingency. It is held fixed; only the value of a saver is drawn.

The value is not

Each of 10 unmeasured inputs is equally likely anywhere between today's market and our target. Loan inputs move together: savers who want credit apply more, borrow more and are approved more.

7.7× is the top corner

It needs every input at its target at the same time. None of the 1,000 what-ifs gets there; the best tenth reach 4.0× or more.

A Monte Carlo: 1,000 random what-ifs, the loan inputs moving together. Market values: the middle of the 2024–26 evidence. LTV/CAC: revenue less serving over 60 months, divided by the cost to win; undiscounted.

THE COMPANY AT EACH LTV/CAC

At the median 1.75× EBITDA turns positive in month 63 on $4.7M; at 3×, month 46 on $3.1M; at our targets, month 33 on $1.8M

LTV/CAC · CHANCE OF AT LEAST THIS	MONEY NEEDED IN ALL	EBITDA POSITIVE FROM	YEAR 5 EBITDA · 8-YEAR TOTAL
7.7× **our targets** every target at once	**$1.8M**	**month 33**	**₹68 Cr · ₹450 Cr**
5.0× chance 3%	**$2.3M**	**month 37**	**₹34 Cr · ₹231 Cr**
3.0× chance 23%	**$3.1M**	**month 46**	**₹10 Cr · ₹77 Cr**
2.0× chance 43%	**$4.2M**	**month 57**	**–₹1.20 Cr · ₹2.60 Cr**
1.75× **main case (median)** chance 50%	**$4.7M**	**month 63**	**–₹4.00 Cr · –₹15 Cr**
1.0× chance 84%	**$8.1M**	**not by year 8**	**–₹12 Cr · –₹67 Cr**
0.4× **today's market** every input at market	**$11.6M**	**not by year 8**	**–₹17 Cr · –₹102 Cr**

One plan, many outcomes

Every row is the same company: 20,000 online savers a month from month 30, the same team and the same cost to win. Only the value of a saver changes.

The main case

Every unmeasured input 48% of the way from today's market to our target gives the median, 1.75×. The financials are built on it.

What the seed buys

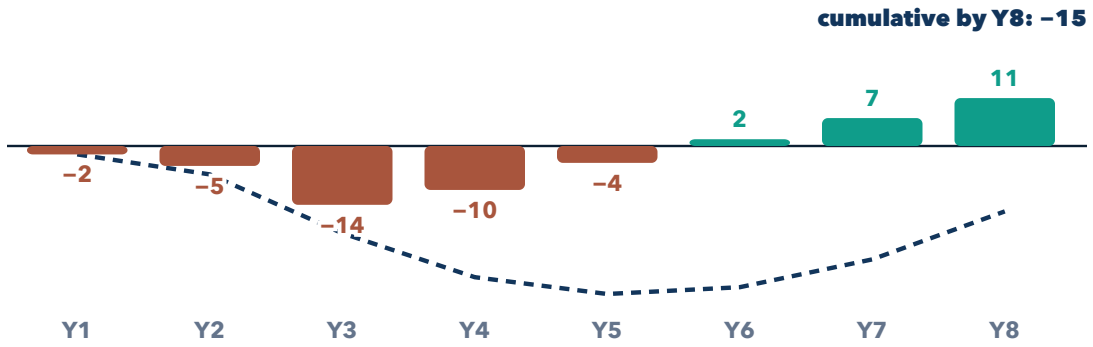

Which row we are on. The next round (money needed less the $0.5M seed) is about $4.2M at the median and $2.6M at 3×.

Each row: every unmeasured input the same share of the way from today's market to our target, solved for that LTV/CAC, and every row still scales to 20,000 savers a month. EBITDA: operating profit before tax. Chance: share of the 1,000 what-ifs at or above it. Money needed: the deepest cumulative cash hole, seed included, plus a ₹5 crore floor. Doorstep savers (1 in 10) carry the same loan inputs. Undiscounted.

THE FINANCIALS

The main case, 1.75×: EBITDA turns positive in month 63, the company needs $4.7M in all, and 8 years add up to −₹15 Cr

EBITDA (OPERATING PROFIT) BY YEAR, ₹ CRORE; CUMULATIVE DASHED

THE MAIN CASE'S INPUTS, OUR TARGET IN GREY

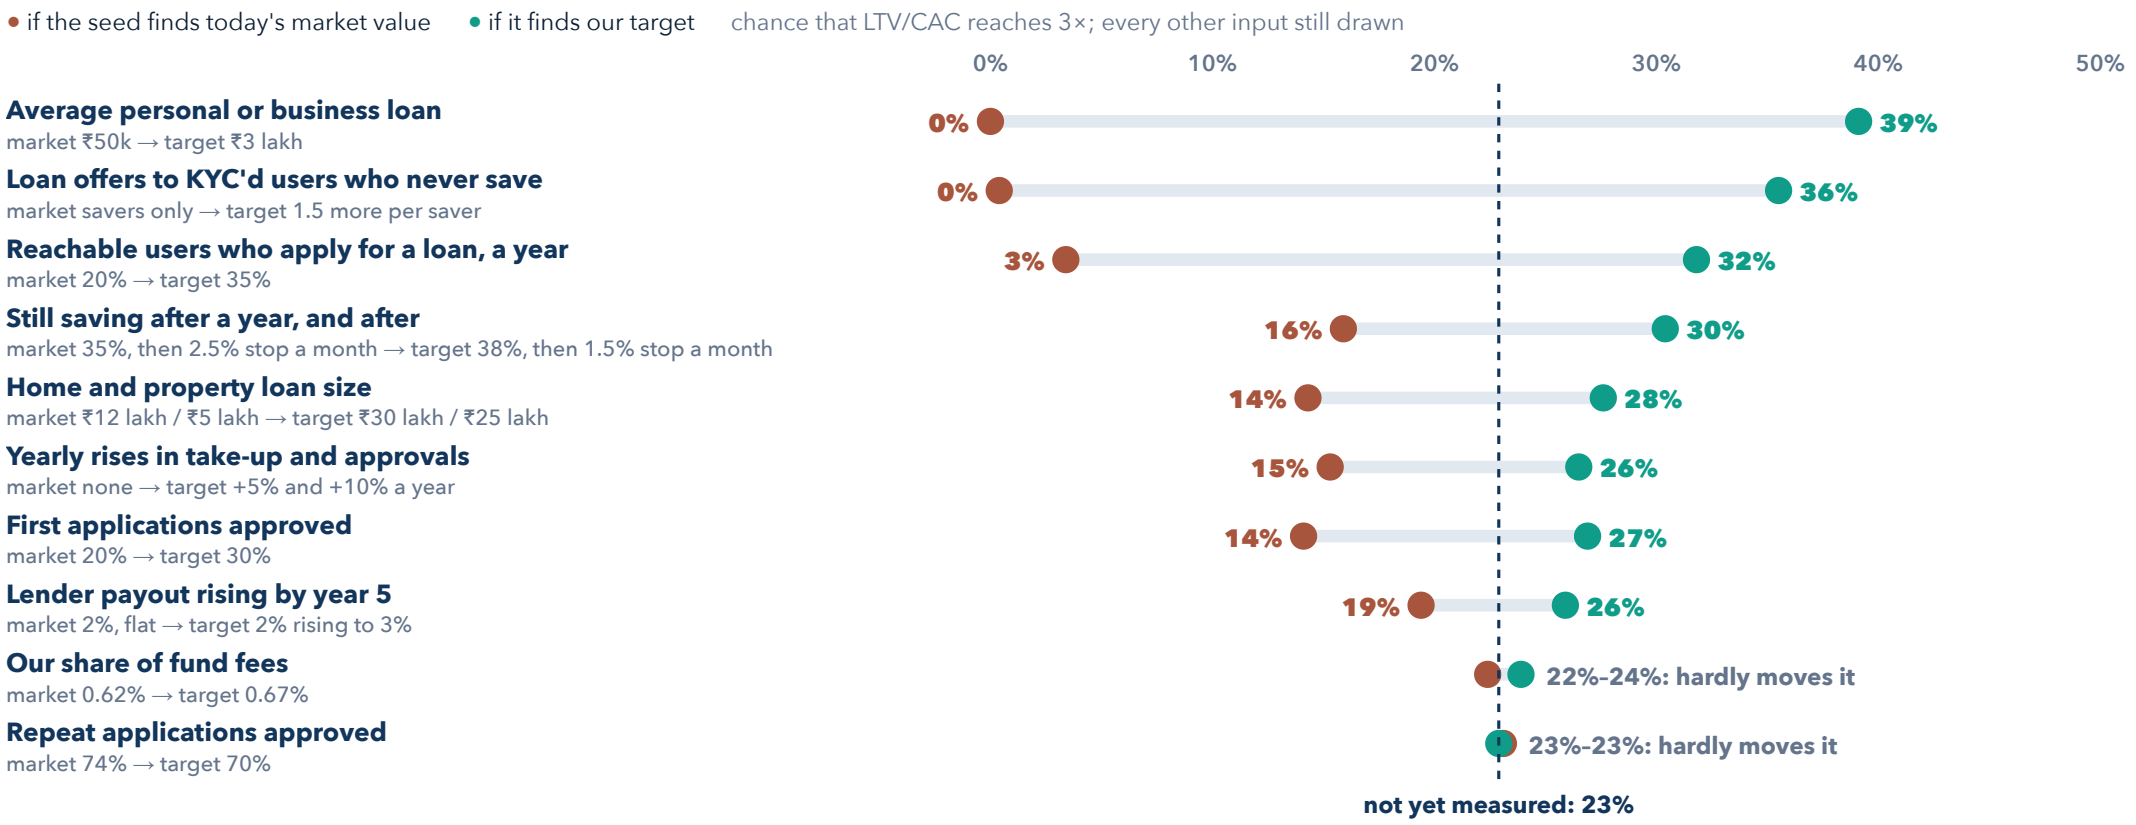

Average personal or business loan	**₹1.7 lakh**	₹3 lakh
Loan offers to KYC'd users who never save	**0.7 more per saver**	1.5 more per saver
Reachable users who apply for a loan, a year	**27%**	35%
Still saving after a year, and after	**36%, then 2.0% stop a month**	38%, then 1.5% stop a month
Home and property loan size	**₹21 lakh / ₹15 lakh**	₹30 lakh / ₹25 lakh
Yearly rises in take-up and approvals	**+2.4% and +5% a year**	+5% and +10% a year
First applications approved	**25%**	30%

Cumulative EBITDA, ₹ Cr	−1.98	−6.65	−20.43	−30.73	−34.68	−33.09	−26.55	−15.33

20,000 online savers a month from month 30 after the seed, 1 in 10 from the doorstep; cost to win ₹600 in the seed and ₹450 after. Doorstep savers carry the same loan inputs as online savers. Team and other costs include the 10% contingency. Undiscounted; tax on profit after losses carried forward.

WHAT EACH MEASUREMENT IS WORTH

The average loan decides most: if it proves at ₹3 lakh the chance of 3× rises from 23% to 39%; at ₹50k it falls to 0%

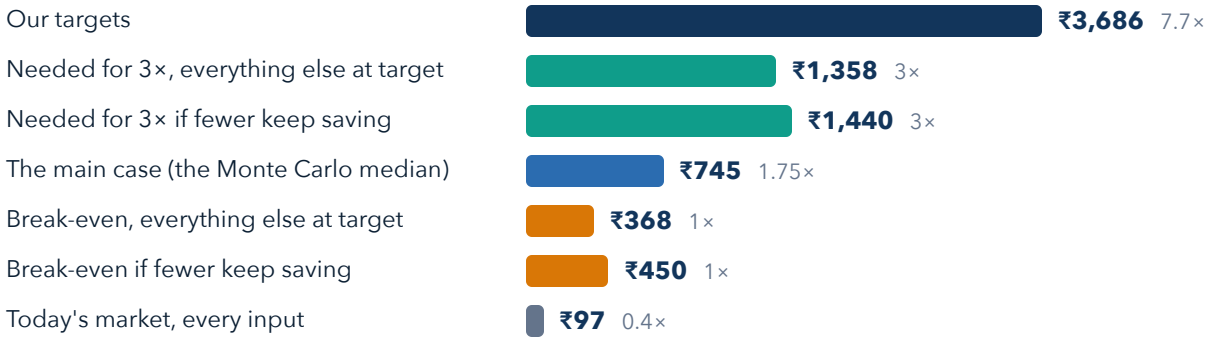

The same 1,000 what-ifs with one input fixed at today's market value, then at our target. Inputs ranked by how much the median moves.

THE ONE NUMBER

What has to be true: lenders pay us ₹3,686 per saver won at our targets and ₹745 in the main case; 3× needs ₹1,358, break-even ₹368

LENDER FEES PER ONLINE SAVER WON, FIRST 5 YEARS (₹)

What that means in loans: personal and business loans per 100 savers won over five years, at each average loan size (other lenders' loans not counted, so these are the most needed). Our targets have 38 at ₹3 lakh.

AVERAGE LOAN	BREAK-EVEN	3×	3× IF FEWER KEEP SAVING
₹50k	30	112	119
₹1 lakh	15	56	59
₹3 lakh	5	19	20

Why this number

Lender fees are 85% of a saver's revenue at our targets. The cost to win is known, so this is the number that decides: below ₹1,358 per saver won, LTV/CAC falls under 3×.

Today's market

On the largest payments and lending apps, 1–5% of users take a loan in a year and first loans are ₹5,000–25,000. Nobody has measured savers who choose to see lender offers.

What the seed measures

Month by month: the share of KYC'd users who opt in to offers, first loans per 100, the median approved loan, and the fee lenders pay after refunds to lenders, in writing.

Lender fees per saver won: every loan referral fee from one online saver won and the KYC'd users who came with them, over five years, after payouts taken back. Cost to win ₹495 throughout (₹450 plus our 10% contingency). Fewer keep saving: 35% still saving at a year and 2.5% stopping each month after, the middle of the evidence. Main case: every unmeasured input 48% of the way from today's market to our target. Today's market: 20% of reachable users apply a year, 20% of first applications and 74% of repeats approved, no yearly rises, ₹50,000 personal and business loans, ₹12 lakh home and ₹5 lakh property loans, offers to savers only, a 2% payout with no rise, 0.62% of the fund as our fee, 35% still saving at a year and 2.5% stopping a month after.

THE FIVE NUMBERS

The $0.5M seed measures the five numbers that decide LTV/CAC, and with it whether the next round is about $4.2M or $2.6M

1

Average personal or business loan

Target ₹3 lakh; today's market ₹50k.

Chance of 3×: 0% at market, 39% at target.

2

Loan offers to KYC'd users who never save

Target 1.5 more per saver; today's market savers only.

Chance of 3×: 0% at market, 36% at target.

3

Reachable users who apply for a loan, a year

Target 35%; today's market 20%.

Chance of 3×: 3% at market, 32% at target.

4

Still saving after a year, and after

Target 38%, then 1.5% stop a month; today's market 35%, then 2.5% stop a month.

Chance of 3×: 16% at market, 30% at target.

5

Home and property loan size

Target ₹30 lakh / ₹25 lakh; today's market ₹12 lakh / ₹5 lakh.

Chance of 3×: 14% at market, 28% at target.

HOW THE SEED GETS THERE

$0.5M

the seed: build, licences, a lean team, the doorstep pilot

1 lakh

sign-ups in months 4–18 to read the five numbers

Months 16–18

12 months of data on the first savers; raise the next round (the seed budget runs to month 24 if it is late)

$4.2M or $2.6M

the next round: in the main case, or if the seed proves 3×

The seed is not a profit plan. The cost to win is measured; the seed buys five measurements of what a saver is worth, and they decide the row of the ladder the next round is raised on.

Chance of 3×: the Monte Carlo with that one input fixed at today's market value, then at our target, every other input still drawn. Next round: money needed in all, less the $0.5M seed. The seed plan, a separate document, has the team and the use of funds.

APPENDIX

Inputs, ranges, year-by-year tables and the checks behind every number

A1 Inputs: today's market, the main case, our targets (p14) · **A2** Agreed product inputs (p15) · **A3** Costs and team (p16) · **A4** The seed budget (p17) · **A5** Regulatory path (p18) · **A6** The main case, year by year (p19) · **A7** At our targets, year by year (p20) · **A8** The Monte Carlo: tables (p21) · **A9** Every assumption tested around the main case (p22) · **A10** Input audit (p23) · **A11** Spreadsheet check (p24) · **A12** How this differs from the earlier offline plan (p25) · **A13** The upside: $1B at our targets (p26) · **A14** At our targets: capturing 10 crore savers, year by year (p27) · **A15** Loan and cross-sell sources (p28)

A1 · INPUTS

The ten inputs nobody has measured run from today's market to our target; the main case sits 48% of the way

INPUT	TODAY'S MARKET	MAIN CASE	OUR TARGET	WHERE THE MARKET FIGURE COMES FROM
Average personal or business loan	₹50k	**₹1.7 lakh**	₹3 lakh	first loans ₹5,000–25,000; digital lenders ₹15,000–1.2 lakh (bureau, FACE)
Loan offers to KYC'd users who never save	savers only	**0.7 more per saver**	1.5 more per saver	not measured anywhere
Reachable users who apply for a loan, a year	20%	**27%**	35%	1–5% of app users borrow a year (Paytm, Kissht, PhonePe filings)
Still saving after a year, and after	35%, then 2.5% stop a month	**36%, then 2.0% stop a month**	38%, then 1.5% stop a month	24–45% at a year; 1–4% a month after
Home and property loan size	₹12 lakh / ₹5 lakh	**₹21 lakh / ₹15 lakh**	₹30 lakh / ₹25 lakh	mass-market lenders ₹10–15 lakh / ₹3–10 lakh
Yearly rises in take-up and approvals	none	**+2.4% and +5% a year**	+5% and +10% a year	no source found
First applications approved	20%	**25%**	30%	11% of new applicants at an app lender (prospectus)
Lender payout rising by year 5	2%, flat	**2% rising to 2.5%**	2% rising to 3%	rate cards 1–2.5%, flat
Our share of fund fees	0.62%	**0.64%**	0.67%	0.50–0.88% equity, 0.08–0.50% debt
Repeat applications approved	74%	**72%**	70%	74% of repeat customers at an app lender
Cost to win a saver (measured, held fixed)	–	₹600 in the seed, ₹450 after, + 10%	–	Our own funnel (founders, 23 Oct)
Daily amount	–	₹100	–	Bachatt's stated minimum (founders, 21 Oct)
Still saving at month 3	–	80%	–	SBI MF's ₹250 daily SIP: a steady ~7% a month
Doorstep share of savers / still saving after a year	–	10% / 55%	–	Founders' decision (90% online) / agreed street input
Equity share; returns a year	–	80%; 10% equity, 7% debt	–	Practitioner conversation (not yet filed); our estimate; agreed
Gold loans	–	₹1 lakh, 0.5% payout	–	Industry average ₹1.96 lakh (Experian), smaller here
Planning rate	–	₹95 per $	–	Founders' decision

The Monte Carlo draws each of the ten anywhere between today's market and our target, the loan inputs moving together (A8). Every other input is fixed at its agreed value.

A2 · AGREED PRODUCT INPUTS

The agreed product inputs that matter most, held at their likely values (ranges agreed 16 Oct)

INPUT	LOW	LIKELY	HIGH	UNIT	CONFIDENCE
In months 1–6, every take-up as a share of the agreed rate	25%	50%	75%	of the full rate (100% from month 7)	Our judgement
In months 1–6, loan and card approvals as a share of the agreed rate	40%	60%	80%	share of the agreed approval, months 1–6	Our judgement
Two-wheeler / e-rickshaw loan: ticket	80,000	1,50,000	6,00,000	₹ a loan	Our judgement
First-loan and card approval rise each calendar year as lenders see our pool's repayments	0%	10%	20%	a year, relative	Our judgement
Loan against property: approval share	30%	45%	60%	share of applicants approved	Our judgement
All take-up hazards rise each calendar year as the pool's history grows	0%	5%	15%	a year, relative	Our judgement
Growth in the saver's daily amount per year saved	0%	5%	10%	share a year	Our judgement
Bill payments: ticket	12	24	36	bills a year	Our judgement
Shop insurance: our commission	10%	14%	15%	share of first-year premium	Published
FD via partner banks: take-up a year	5%	10%	20%	share of active savers, a year	Our judgement
Running cost per active saver a month	0	5	15	₹ a saver a month	Founder-supplied
Term life: take-up a year	1%	3%	6%	of savers without it, a year	Our judgement
Digital gold: renews a year	50%	65%	80%	share still buying after a year	Our judgement
Two-wheeler insurance: our commission	2.5%	4.75%	9.05%	blended share of premium	Published

The inputs that moved the earlier Monte Carlo most. The LTV/CAC Monte Carlo varies only the ten unmeasured inputs (A1); these stay at their likely values (the yearly rises in take-up and approvals are among the ten). The full list of agreed ranges travels with the model.

A3 · COSTS AND TEAM

Costs and team: the seed (months 1–18) and after the round

LINE	SEED (MONTHS 1–18)	AFTER THE ROUND (MONTH 19 ON)
Founders	₹95,000 ($1,000) a month each until month 18	₹1.5 lakh a month each after the round (+10% statutory, +7% a year)
Engineers	1 from month 1 (₹1.1 lakh), 1 junior from month 7 (₹50k)	3 + 1 per 2 lakh active savers, up to 40 (₹1.2 lakh)
Operations and support	1 from month 4 (₹30k)	1 per 20,000 active savers, at least 2 (₹40k)
Product, compliance, growth, finance, risk	Founders, CA and lawyer	1 each, scaling with savers and ad spend
App and tech	₹15 lakh to integrate, ₹1.5 lakh a month	₹1.5 lakh a month + ₹4 per KYC'd user reached
Office	Co-working ₹75k a month	₹1.5 lakh + ₹10k a head a month
Compliance	Setup ₹1.25 lakh; ₹10 lakh a year	₹25 lakh a year
Brand, design, fund-raising	Design ₹1 lakh a month in months 1–3; ₹5 lakh to raise the seed	Brand ₹2 lakh a month; ₹15 lakh for the next round
Doorstep agents	₹26,000 a month all-in; 100 sign-ups a month after a 3-month ramp	1 team lead per 10 agents and 1 office per 15, once above 5 agents
Contingency	10% on every cost line (agreed)	10% on every cost line (agreed)
Cash timing	Fund and partner fees arrive 2 months after they are earned (agreed)	Same

Seed numbers are the seed plan's; later rules are our judgement on agreed salary inputs. The 10% contingency also applies to acquisition, so ₹450 to win costs ₹495 in the company model. Tax 25% after losses carried forward; no interest on cash.

THE $500K

The money builds the product first; 25% is held as contingency

PRODUCT AND TEAM	CUSTOMER ACQUISITION	CONTINGENCY
$240k · 48%	$133k · 27%	$127k · 25%

Product and team · $240k

Salaries: 2 founders + 3 hires	$92k
App: build and running	$54k
Office and fund-raising	$24k
Setup, licences, compliance	$22k
Support, payments and per-user tech	$45k
Design while building	$3.2k

24 months. Salaries $92k, founders at $1,000 a month each.

Customer acquisition · $133k

Online sign-ups	$102k
KYC checks	$22k
Doorstep pilot, NCR	$8.6k

1 lakh sign-ups in months 4–18; ₹570 per saver won, online and doorstep blended (₹600 online).

Contingency · $127k

Covers the downside. If a sign-up costs ₹200, not ₹100, acquisition costs $235k and the plan still fits in $500k, with about $25k to spare.

Or buys time. If the next round is late, it keeps the lean team and the savers served while the round closes. The company plan raises in month 19 and scales from there; it does not count this reserve.

All figures over 24 months, at a planning rate of ₹95 per $. Revenue is not included, so every number is a cost.

LICENCES AND TIE-UPS

Day one needs no RBI licence; each later step adds one

BEFORE LAUNCH · MONTHS 0-3

Company setup, ₹1.25 lakh
includes AMFI distributor registration (₹40,000 + GST)

NISM exam for both founders
₹1,500 + GST each; renewed every 3 years

BSE StAR MF access
orders and SIP mandates; no transaction fee to distributors

3-5 fund houses
empanelled for equity and debt funds

KYC and UPI Autopay partners
e-KYC ₹3–7 a check (₹40 budgeted per KYC with KRA, PAN and bank checks); daily mandates allowed

Data protection
consent flows and data kept in India

AFTER LAUNCH · MONTHS 4-12

Loans as a DSA / lending service provider
from month 7: partner lenders pay us per loan; RBI digital-lending rules apply (the borrower pays us nothing)

Insurance through a broker partner
from month 7, for a fixed referral fee; our own registration later

Credit cards with issuers
the issuer decides every card

Legal opinions first
lender-offer consent, the insurance fee, agent rules; agents never handle cash

WE WILL NEVER

- ✕ Hold customer money
- ✕ Offer cashback on funds or insurance
- ✕ Run lucky draws or savings circles
- ✕ Use anyone's data without consent

WITH THE NEXT ROUND

Deeper lender partnerships
larger fees on a proven book; first-loss cover only with its own capital (up to 5% of loans, held as cash)

Own NBFC
₹10 crore of capital; about 8–14 months or more

Insurance distribution licence
under IRDAI's draft rules, once final

Sources: AMFI, NISM, RBI Digital Lending Directions 2025, RBI NBFC capital norms, IRDAI, Banning of Unregulated Deposit Schemes Act 2019, Digital Personal Data Protection Act 2023.

A6 · THE MAIN CASE

A6 · The main case: 20,000 online savers a month, year by year

	Y1	Y2	Y3	Y4	Y5	Y6	Y7	Y8
Online savers won	11,664	48,284	216,620	240,000	240,000	240,000	240,000	240,000
Doorstep savers won	1,600	5,083	23,717	27,600	27,600	27,600	27,600	27,600
Active savers (end)	9,963	48,347	190,460	281,575	351,543	406,302	449,159	482,701
Money saved, ₹ Cr (end)	7.8	39.9	234.0	570.4	1,001.2	1,474.4	1,953.7	2,416.3
Fund fees, ₹ Cr	0.02	0.13	0.83	2.62	5.14	8.09	11.17	14.21
Loan fees, ₹ Cr	0.05	0.34	2.33	6.45	10.58	13.67	16.15	18.23
Cards, ₹ Cr	0.01	0.05	0.32	0.60	0.65	0.65	0.65	0.65
Insurance, ₹ Cr	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00
Other products, ₹ Cr	0.04	0.23	1.50	3.94	6.22	7.91	9.28	10.37
Revenue, ₹ Cr	0.11	0.76	4.98	13.59	22.59	30.31	37.25	43.46
Acquisition, ₹ Cr	0.76	2.53	10.77	11.92	11.92	11.92	11.92	11.92
Team, ₹ Cr	0.42	1.06	2.15	2.80	3.26	3.73	4.33	4.79
Other costs, ₹ Cr	0.91	1.83	5.83	9.18	11.36	13.08	14.46	15.53
EBITDA, ₹ Cr	-1.98	-4.67	-13.78	-10.30	-3.95	1.59	6.54	11.23
PAT, ₹ Cr	-1.98	-4.67	-13.78	-10.30	-3.95	1.59	6.54	11.23
Heads (end)	5	13	20	26	29	33	35	37
Doorstep agents (end)	2	12	23	23	23	23	23	23

Main case: every unmeasured input 48% of the way from today's market to our target (A1). Money saved = savers' average fund balance. PAT = profit after tax; it equals EBITDA while past losses absorb the tax. Heads = headcount. Other costs include the 10% contingency on every line.

A7 · AT OUR TARGETS (7.7×, NOT THE PLAN)

A7 · At our targets (7.7×, not the plan): 20,000 online savers a month, year by year

	Y1	Y2	Y3	Y4	Y5	Y6	Y7	Y8
Online savers won	11,664	48,284	216,620	240,000	240,000	240,000	240,000	240,000
Doorstep savers won	1,600	5,083	23,717	27,600	27,600	27,600	27,600	27,600
Active savers (end)	10,017	48,745	193,302	290,986	370,959	437,666	493,309	539,722
Money saved, ₹ Cr (end)	7.8	41.0	242.2	607.4	1,103.7	1,683.4	2,308.5	2,951.0
Fund fees, ₹ Cr	0.02	0.14	0.89	2.87	5.81	9.46	13.53	17.80
Loan fees, ₹ Cr	0.20	1.61	12.31	37.79	68.67	90.59	108.95	125.03
Cards, ₹ Cr	0.01	0.05	0.37	0.76	0.88	0.88	0.88	0.88
Insurance, ₹ Cr	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00
Other products, ₹ Cr	0.08	0.60	4.18	11.95	20.49	26.30	31.16	35.20
Revenue, ₹ Cr	0.31	2.41	17.75	53.36	95.86	127.24	154.53	178.92
Acquisition, ₹ Cr	0.76	2.53	10.77	11.92	11.92	11.92	11.92	11.92
Team, ₹ Cr	0.42	1.06	2.16	2.84	3.30	3.92	4.48	5.24
Other costs, ₹ Cr	0.93	1.92	6.35	10.25	12.98	15.28	17.21	18.85
EBITDA, ₹ Cr	-1.79	-3.10	-1.52	28.35	67.67	96.12	120.92	142.91
PAT, ₹ Cr	-1.79	-3.10	-1.52	22.87	50.75	72.09	90.69	107.19
Heads (end)	5	13	20	26	30	34	37	40
Doorstep agents (end)	2	12	23	23	23	23	23	23

Every loan input at our target at once (LTV/CAC 7.7×): the top of the ladder, not the plan. Money saved = savers' average fund balance. PAT = profit after tax; it equals EBITDA while past losses absorb the tax. Heads = headcount. Other costs include the 10% contingency on every line.

A8 · THE MONTE CARLO

1,000 what-ifs on the value of a saver: the results, and what each measurement is worth

ACROSS THE 1,000 WHAT-IFS	BAD (P10)	MIDDLE (P50)	GOOD (P90)
LTV/CAC, 5 years	0.85×	1.75×	3.96×
LTV/CAC, 8 years	1.55×	2.77×	5.96×
Saver pays back	month 18	month 39	month 67
Company EBITDA positive from	month 39	month 63	not by year 8
Money needed in all	$2.5M	$4.7M	$9.3M
Year 5 EBITDA	–₹14 Cr	–₹3.93 Cr	₹22 Cr
Cumulative EBITDA, 5 years	–₹53 Cr	–₹35 Cr	₹13 Cr
Cumulative EBITDA, 8 years	–₹79 Cr	–₹15 Cr	₹151 Cr

CHANCE OF	SHARE OF WHAT-IFS
LTV/CAC at least 1× (pays back in 5 years)	84%
LTV/CAC 3× or more	23%
LTV/CAC 5× or more	3%
Company profitable by month 60	46%
Company profitable by month 96	79%

IF THE SEED FINDS THIS INPUT AT…	MEDIAN: MARKET	MEDIAN: TARGET	3×: MARKET	3×: TARGET
Average personal or business loan	1.1×	2.6×	0%	39%
Loan offers to KYC'd users who never save	1.3×	2.3×	0%	36%
Reachable users who apply for a loan, a year	1.4×	2.2×	3%	32%
Still saving after a year, and after	1.5×	2.0×	16%	30%
Home and property loan size	1.5×	2.0×	14%	28%
Yearly rises in take-up and approvals	1.6×	1.9×	15%	26%
First applications approved	1.6×	1.9×	14%	27%
Lender payout rising by year 5	1.6×	1.8×	19%	26%
Our share of fund fees	1.7×	1.8×	22%	24%
Repeat applications approved	1.8×	1.7×	23%	23%

The cost to win is held at ₹450 + 10% (₹600 in the seed). Each of the ten unmeasured inputs is drawn anywhere between today's market and our target (A1), the six loan inputs moving together. Bad / middle / good = the 10th, 50th and 90th of the 1,000 what-ifs, each measure on its own, so the middle column differs slightly from the main case (A6), one consistent set of inputs. Company results at 20,000 online savers a month.

A9 · EVERY ASSUMPTION TESTED

Every assumption we tested, one at a time around the main case, at 20,000 online savers a month

ASSUMPTION CHANGED	PROFIT FROM MONTH	MONEY NEEDED	Y5 EBITDA ₹ CR	Y8 EBITDA ₹ CR	ACTIVE SAVERS AT MONTH 60 (LAKH)
The main case	63	$4.7M	-4.0	11.2	3.5
24% still saving at a year (savings apps)	81	$5.8M	-7.9	2.7	2.6
45% still saving at a year	58	$4.3M	-1.5	16.7	3.9
₹200 a day	53	$3.9M	1.2	25.4	3.5
₹300 a day	49	$3.5M	6.3	39.6	3.5
10% apply for a loan a year	after m96	$9.2M	-13.8	-5.5	3.5
50% apply for a loan a year	45	$2.9M	10.0	35.5	3.5
Loan offers to savers only	82	$6.2M	-8.8	2.9	3.5
Credit-hungry: 45% stay + 50% apply	42	$2.8M	14.6	45.3	3.9
Cost to win ₹300	55	$3.4M	0.0	15.2	3.5
Cost to win ₹600 (our funnel)	73	$6.4M	-8.1	7.0	3.5
Debt-only funds	83	$5.8M	-7.3	1.9	3.5
Online only after m18	64	$4.4M	-3.8	9.6	3.1

One assumption changed at a time, on top of the main case; the first row is the main case. The apply-rate rows replace the main case's 27%; the retention rows its 36% at a year.

A10 · INPUT AUDIT

All 75 inputs checked against their sources, re-checked on 22 Oct, before the main case was set

17
match their source

21
our judgement, labelled as such

23
partly supported: carried as ranges (A1, A8)

7
targets: the loan funnel (now drawn, A1) and the cost to win (now measured)

7
wrong or unsourced: fixed or flagged below

WHAT THE AUDIT FOUND, AND WHAT CHANGED

FINDING	WHAT THIS MODEL DOES
The loan funnel (35% apply, the loan sizes, offers to 2.5 users a saver, payout rising to 3%) was labelled as evidence	Labelled as targets, each with its evidence and where it pulls LTV/CAC down to 3× and 2× (re-audited 22 Oct)
No payment cost on debits; tech ₹1 a saver a month	₹2 a weekly debit; ₹4 tech for every KYC'd user reached
Insurance counted 75% of a broker's commission; the Choti SIP incentive and digital gold were counted	Insurance: a fixed referral fee, not counted until agreed; Choti and digital gold off
Cost to win in the seed was ₹550; the seed's own funnel gives ₹600 an online saver	Seed now ₹600; ₹450 after the seed, range ₹300–600
The agreed 10% contingency on every cost line was missing	Added, inside EBITDA and on the LTV's cost to win (₹495)
The agreed 2-month delay before fees arrive in cash was missing	Added to cash and money needed
Compliance of ₹25 lakh a year after the seed is not an agreed input	Kept; A3 marks post-round costs as our judgement
Loan against property take-up (0.5%) and size (₹15 lakh) had no source	Take-up rebuilt 21 Oct from lender data (3% of loan applicants, 1% payout); size ₹25 lakh, the founders' number (22 Oct), a target

An independent reviewer read each source row; the full 75-row table travels with the model.

A11 · SPREADSHEET CHECK

The live spreadsheet and the model give the same answers in the main case

120 of 120
checks within target

0.22%
largest revenue gap, any year, any case

14 of 15
cases with the same profit month

THE LIVE SHEET NEXT TO THE MODEL

MEASURE	MAIN CASE, 20,000 A MONTH: SHEET	… MODEL	1,50,000 A MONTH: SHEET	… MODEL
Revenue, year 5 (₹ Cr)	22.59	22.59	163.43	163.42
EBITDA, year 5 (₹ Cr)	-3.95	-3.95	-15.08	-15.08
Revenue, year 8 (₹ Cr)	43.48	43.46	321.02	320.89
EBITDA, year 8 (₹ Cr)	11.25	11.23	101.47	101.34
Profit from month	63	63	59	59
Money needed (₹ Cr; $4.7M at 20,000)	44.5	44.5	221.4	221.2
Active savers, month 60	351,543	351,543	2,587,140	2,587,140

Both plans: revenue and EBITDA in every year 1–8, profit month, money needed, active savers, money saved. Each of the 13 assumption changes: years 5 and 8 and the profit month. The live Google Sheet carries the main case's inputs since 24 Oct and was read back after the push (month 63, $4.7M, 1.75×); the older offline tabs are hidden.

A12 · THE EARLIER OFFLINE PLAN

How this plan differs from the earlier offline plan

	EARLIER OFFLINE PLAN (STREET AGENTS)	THIS PLAN (ONLINE FIRST)
Channel	Street agents collect cash from every saver	90% online by UPI Autopay; 10% doorstep agents, no cash
Daily amount	₹350, in cash	₹100 (₹50–300)
Still saving after a year	55% for every saver	36% online in the main case (target 38%); 55% at the doorstep
Where the money goes	Debt fund, 0.35% fee	80% equity SIP / 20% debt, 0.64% blended fee in the main case (0.67% at target)
Cost to win a saver	Agent salary + bought leads	₹600 in the seed, ₹450 after: measured, held fixed
Loans	₹2.5 lakh; 18% of savers apply a year	Main case: ₹1.7 lakh, 27% apply a year, 25% approved (targets ₹3 lakh, 35%, 30%)
Home loan	₹25 lakh	Main case ₹21 lakh (target ₹30 lakh), 0.5% payout
Lending	Own NBFC, 30% of personal loans on book from month 30	DSA / lending service provider for partner lenders; no own book
Collections fees	The agent collects overdue loans	None
Money	₹1,108 crore over six rounds; unicorn on paper by month 59	$0.5M seed; $4.7M in all in the main case ($3.1M at 3×, $1.8M at our targets)
Planning rate	₹100 per $	₹95 per $
Uncertainty	Simulated futures for one agent	1,000 what-ifs on the value of a saver, run through the whole company

The v3 offline model and the 18 Oct data refresh are kept, unchanged, for reference.

A13 · THE UPSIDE: $1B BY YEAR 5, AT OUR TARGETS

Upside, not the plan: at 2.5 lakh savers a month with every target holding, 3 of 5 cases clear $1B by year 5; the cheapest needs $7.2M

VALUE AT MONTH 60, ₹ CRORE: FIVE CASES AT 2.5 LAKH ONLINE SAVERS A MONTH, AND THE 10-CRORE PATH. $1B ONLY IF BOTH BARS CLEAR THE LINE

Our targets for every loan input (LTV/CAC 7.7×); five cases at 2.5 lakh online savers a month from month 30, and the 10-crore path at 12.4 lakh a month (30 crore segment, a third captured); 1 in 10 savers from the doorstep. Yardsticks: 20× the month-60 revenue run-rate; 0.45× money saved (a little below the ~0.5× a recent savings-app round paid on money invested). Sign-ups stop at 20% of a 7 crore pool in month 75.

A14 · THE UPSIDE AT OUR TARGETS, NOT THE PLAN

A14 · The upside at our targets, not the plan: capturing 10 crore savers, year by year

	Y1	Y2	Y3	Y4	Y5	Y6	Y7	Y8
Online savers won	11,664	2,187,754	13,359,076	14,910,648	14,910,648	14,910,648	14,910,648	14,798,915
Doorstep savers won	1,600	182,567	1,408,133	1,657,200	1,657,200	1,657,200	1,657,200	1,644,800
Active savers (end)	10,017	2,108,183	11,312,097	17,466,338	22,500,092	26,698,908	30,201,274	32,998,577
Money saved, ₹ Cr (end)	7.8	855.8	12,185.5	33,928.9	64,098.7	99,677.9	138,244.9	178,000.8
Fund fees, ₹ Cr	0.02	1.15	39.46	155.23	333.01	556.33	806.70	1,070.30
Loan fees, ₹ Cr	0.20	23.98	644.86	2,221.26	4,128.15	5,499.60	6,651.96	7,661.16
Cards, ₹ Cr	0.01	1.03	21.78	46.72	54.69	54.69	54.69	54.66
Insurance, ₹ Cr	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00
Other products, ₹ Cr	0.08	8.94	216.98	700.45	1,231.88	1,598.00	1,904.43	2,159.69
Revenue, ₹ Cr	0.31	35.09	923.08	3,123.66	5,747.73	7,708.62	9,417.79	10,945.81
Acquisition, ₹ Cr	0.76	108.71	658.61	734.26	734.26	734.26	734.26	728.75
Team, ₹ Cr	0.42	4.09	35.86	49.35	55.92	62.65	69.57	76.49
Other costs, ₹ Cr	0.93	27.67	294.26	535.12	701.32	839.83	955.50	1,051.21
EBITDA, ₹ Cr	-1.79	-105.38	-65.65	1,804.93	4,256.23	6,071.88	7,658.47	9,089.36
PAT, ₹ Cr	-1.79	-105.38	-65.65	1,396.90	3,192.18	4,553.91	5,743.85	6,817.02
Heads (end)	5	159	535	553	569	581	592	594
Doorstep agents (end)	2	692	1,381	1,381	1,381	1,381	1,381	1,257

The upside (A13): every loan target holding, a third of a 30 crore segment captured. Money saved = savers' average fund balance. PAT = profit after tax; it equals EBITDA while past losses absorb the tax. Heads = headcount. Other costs include the 10% contingency on every line.

A15 · LOAN AND CROSS-SELL SOURCES
