Working name, to be finalised

Seed plan

Daily saving for India's self-employed, in mutual funds, in their own name. Online-first, with a doorstep pilot.

$500k

seed raise

24 months

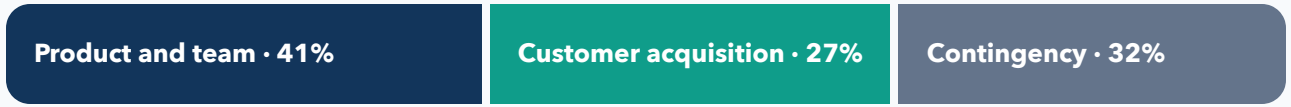

plan period, plus a 32% contingency

1 lakh

sign-ups; ~22,200 start saving, ~13,800 still saving at month 18

5 people

Piyush (CEO), Sandeep (CPTO) + 3 hires

Mostly to build the product. Revenue is not counted anywhere in this plan.

THE $500K

The money builds the product first; 32% is held as contingency

PRODUCT AND TEAM	CUSTOMER ACQUISITION	CONTINGENCY
$205k · 41%	$133k · 27%	$162k · 32%

Product and team · $205k

Salaries: 2 founders + 3 hires	$92k
App: build and running	$54k
Office and fund-raising	$24k
Setup, licences, compliance	$22k
Customer support	$10k
Design while building	$3.2k

24 months. Salaries $92k, founders at $1,000 a month each.

Customer acquisition · $133k

Online sign-ups	$102k
KYC checks	$22k
Doorstep pilot, 1 city	$8.6k

1 lakh sign-ups in months 4–18; ₹570 per saver won, online and doorstep blended (₹600 online).

Contingency · $162k

Covers the downside. If a sign-up costs ₹200, not ₹100, acquisition costs $235k and the plan still fits in $500k, with about $60k to spare.

Or buys time. If the next round is late, it keeps the lean team and the savers served while the round closes. The company plan raises in month 19 and scales from there; it does not count this reserve.

All figures over 24 months, at a planning rate of ₹95 per $. Revenue is not included, so every number is a cost.

WHAT 1 LAKH SIGN-UPS COSTS IF ONE NUMBER MOVES

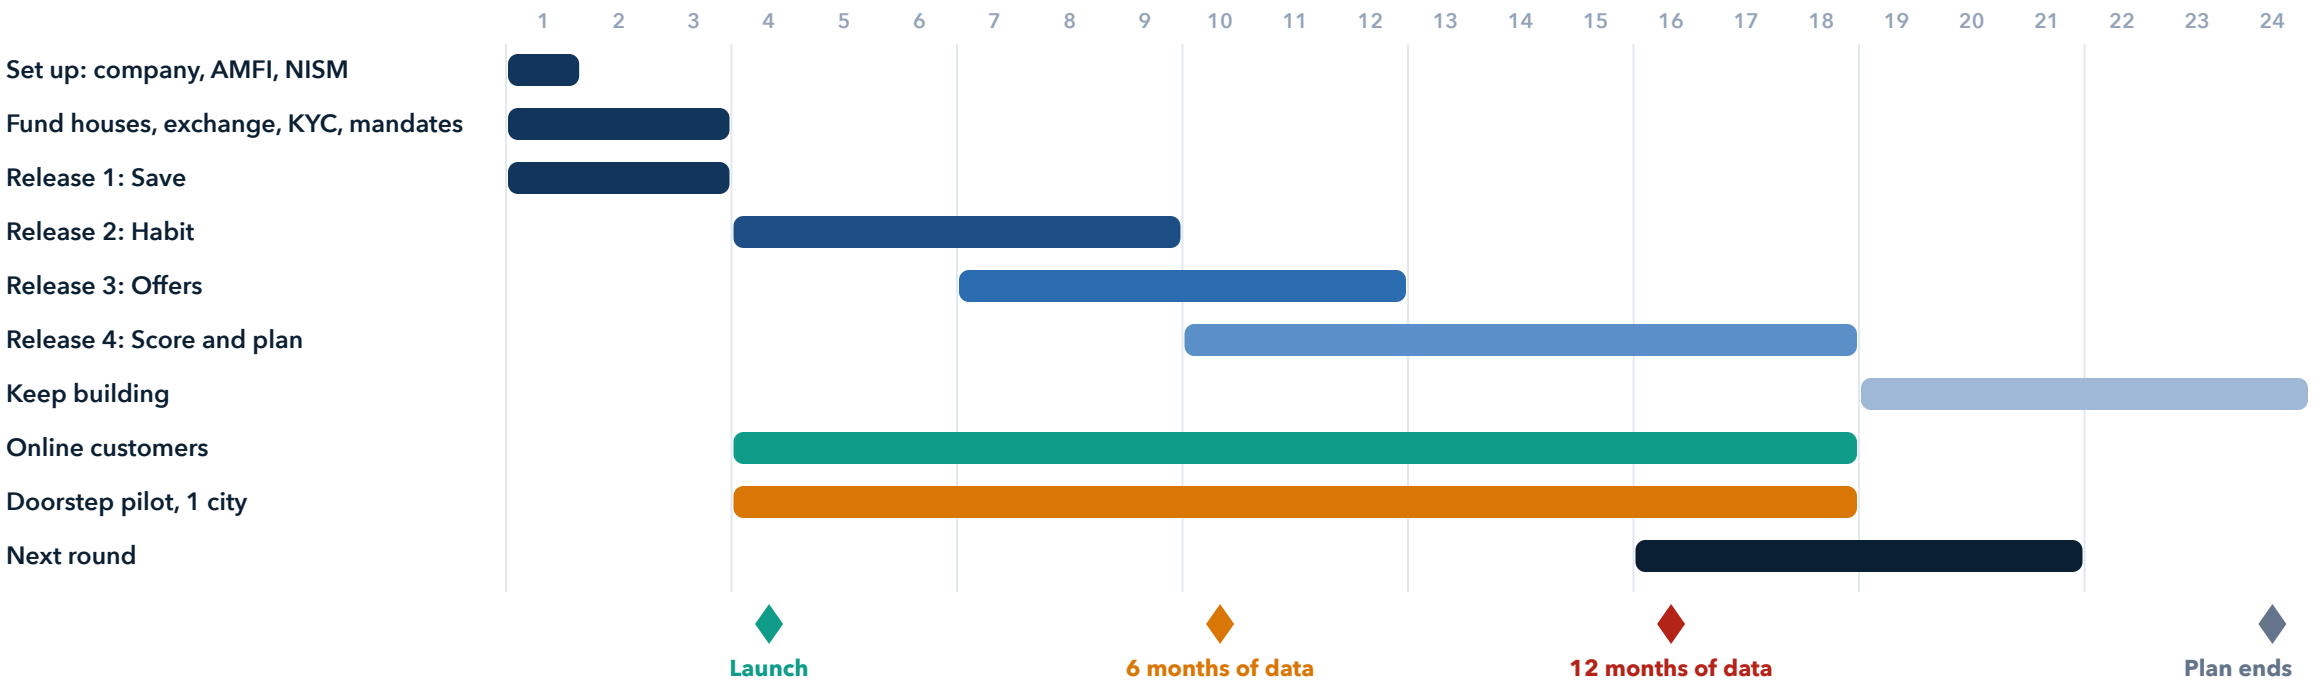

Plan: 1 in 5 sign-ups save. Fewer savers need fewer doorstep agents, so that case costs a little less.

Install costs, vendor benchmarks: fintech median ₹75, wealth apps ₹100–300. Retention: of SBI MF's ₹250 daily SIPs started in FY26, 36% had stopped by year-end (about 38% still saving at a year): our online plan; 55% at the doorstep.

24 MONTHS

Build, launch, prove, then raise on 12 months of data

WHAT WE WILL PROVE BEFORE THE NEXT ROUND

1

Cost to win a saver

₹600 an online saver in the seed (₹570 blended with doorstep); ₹450 planned after; ₹300 (a competitor's figure) brings profit 3 months sooner

2

Still saving at 12 months

38% online is the plan; 45% brings profit 1 months sooner

3

Daily amount

₹100 is the plan; ₹200 brings profit 1 months sooner

4

Who borrows

35% of KYC'd users apply a year is the plan; at 10% profit comes 19 months later

5

Doorstep arm

must clearly beat online's 38% still saving (55% is the plan) to stay
